TruONE® ATS

Automatic Transfer Switches

- Easy to install
- Safety and protection
- Optimum interface

Table of contents

Introducing TruONE® ATS from ABB

A critical breakthrough for critical power

The all-new TruONE® is the world's first true purpose-built automatic transfer switch, engineered to incorporate switch and controller in one seamless unit.

Performance tested beyond standard requirements, TruONE® stands ready to ensure the steady delivery of critical power at all times. Its self-contained design reduces the number of wires and connections, which speeds installation and minimizes the potential for connection failures to ensure best-in-class reliability. Its predictive maintenance and modular components reduce downtime and service costs. And its advanced connectivity is ready for the future. In addition, unlike typical ATS solutions, TruONE® allows emergency manual operation under load for immediate power restoration in the event of an equipment malfunction.

TruONE® represents a major shift in engineering and a critical breakthrough for critical power.

The one ATS with all these advantages

—
01 Detachable HMI. Three levels of control to meet different customer requirements.
—
02 All-in-one concept that brings easy and fast installation.

Easy to Install
Reduces installation time by up to 80%.

Why waste time piecing together an ATS from multiple components and as many as 20 connection wires, not to mention the time spent testing? TruONE® is the first automatic transfer switch to put it all together, including the controller with detachable HMI. It can be installed with a single wire using standard enclosures.

Safety and protection
Reduces risk of operator injury.

TruONE® enables emergency manual operation — even under load — without opening the panel door when the HMI is mounted to the ATS frame. The HMI can be detached from the frame for door mounting, offering more flexibility for the panel designer. Best of all, regardless of the HMI installation method, there's no need for connecting dangerous line voltages to the door, so the risk of operator injury due to equipment malfunction is reduced.

Learn more about ABB Ability™ Energy and Asset Manager

Optimum interface
Simplifies connectivity.

TruONE® features cloud-based connectivity through the ABB Ability™ Energy and Asset Manager. ABB Ability simplifies implementation and use of TruONE® in coordination with other ABB devices, ensuring one common user interface and one common software environment. Market-leading modular connectivity with seven communication protocols ensures easy installation and connectivity now and far into the future.

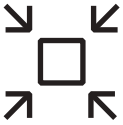
Even more advantages

Speed Up Your Project
Now you can speed up your project even more, thanks to TruONE® automatic commissioning capabilities. Pre-made configuration files can be uploaded from your PC to TruONE®, minimizing the risk of human error and reducing programming time by 80%.

Continuous Operation
TruONE® features predictive maintenance, self-diagnostics and customer-replaceable critical modules to simplify service and significantly reduce downtime and service costs. Say goodbye to blinking lights and stopping motors. TruONE® provides a fast in-phase open transition of power, ensuring unnoticed generator use during business hours.

Energy Efficiency
Full compatibility with ABB Ability™ Energy and Asset Manager allows data processing from the site's electrical equipment to deliver analysis and make recommendations for optimizing the electrical system's performance. This allows remote monitoring of plants, energy consumption and costs at a glance, making implementation of energy management strategies easier and faster.

Optimized Logistics
TruONE® features a wide voltage range from 200 to 480 VAC (with +/-20% tolerance), reducing the need to stock multiple SKUs, reducing inventory and saving space in the warehouse.



Space Saving
TruONE® features plug-in factory and field-mount accessorizing, so you don't need extra space inside the panel. Even in the case of specialized customer needs, you can use standard cabinets.

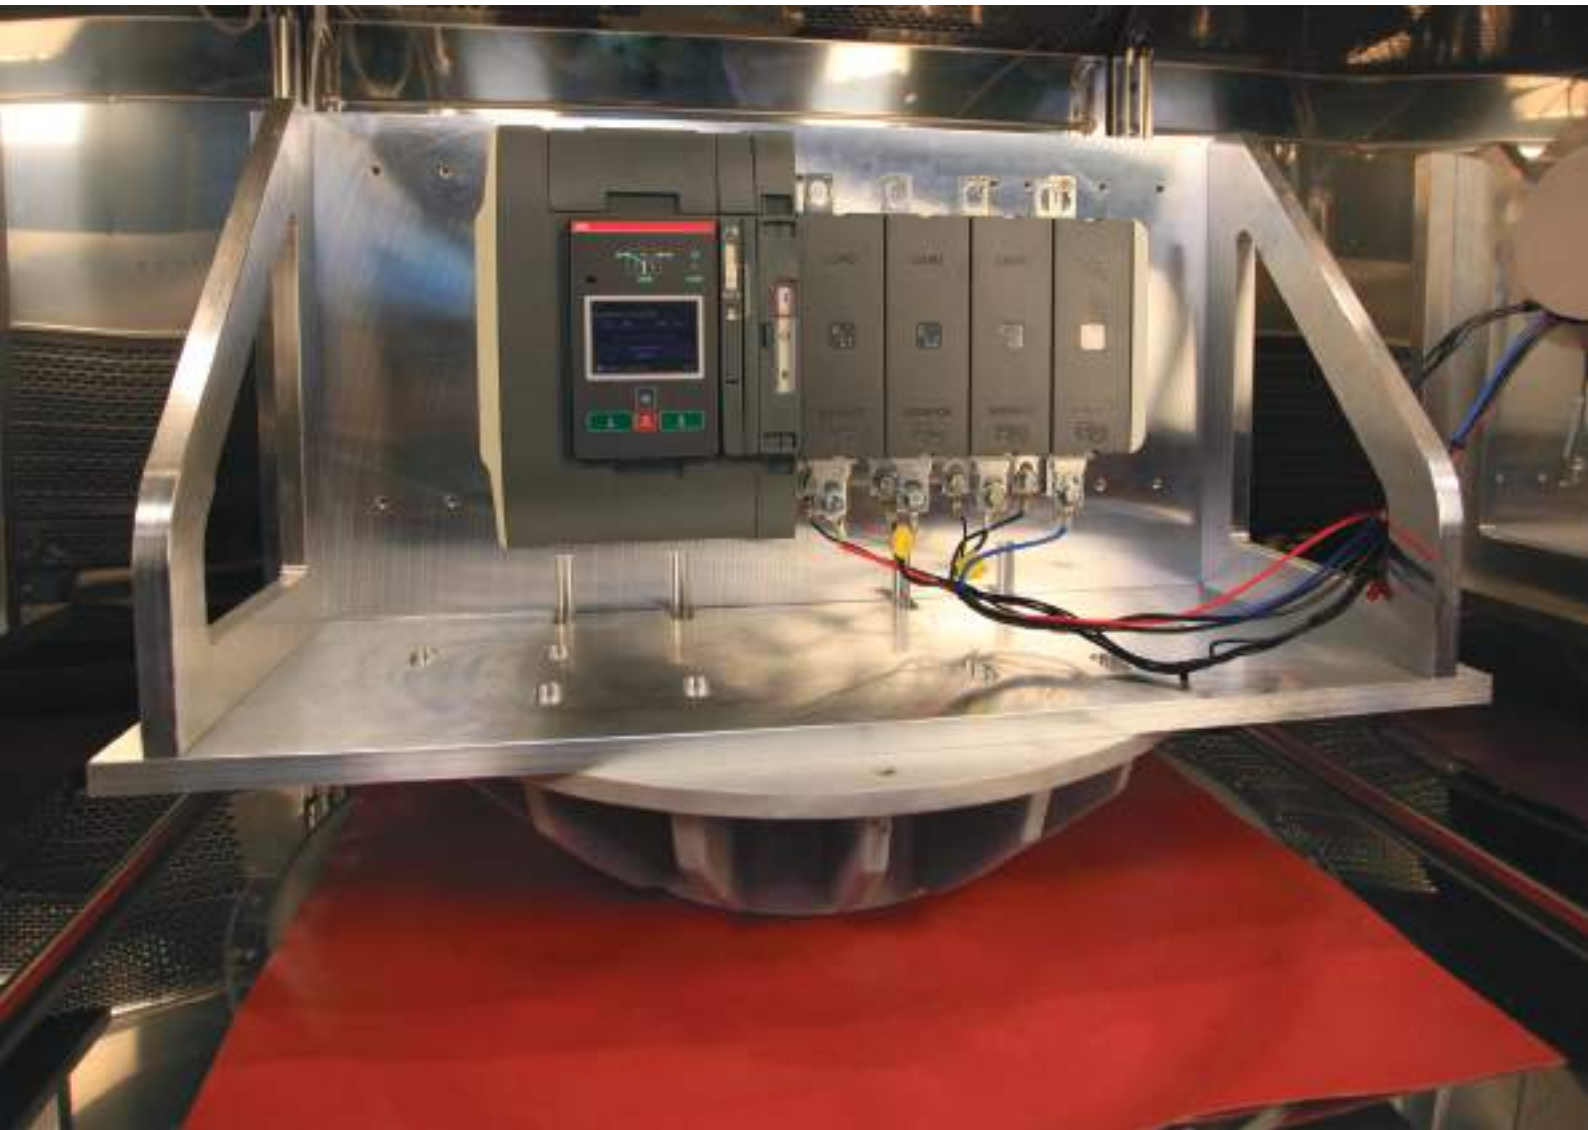
Reliable in extreme conditions

You can be sure TruONE® exceeds standard requirements for performance and reliability to bring you dependable operation in even the most challenging electrical, mechanical and environmental conditions.

TruONE is the only ATS to guarantee safe and reliable operation during dramatic variations in voltage (200–480 VAC with +/-20% tolerance) and it is tolerant of variations of temperature (-25–+70°C), vibrations (IEC 60068-2-3) and shocks (IEC 60068-2-27). TruONE® also has true short-circuit resilience, able to take the hit and remain fully operational after exposure to even the most dangerous phenomena

Site conditions can change due to unexpected situations, but the performance of TruONE® does not.

—
Testing for vibrations, shocks and a wide temperature range.

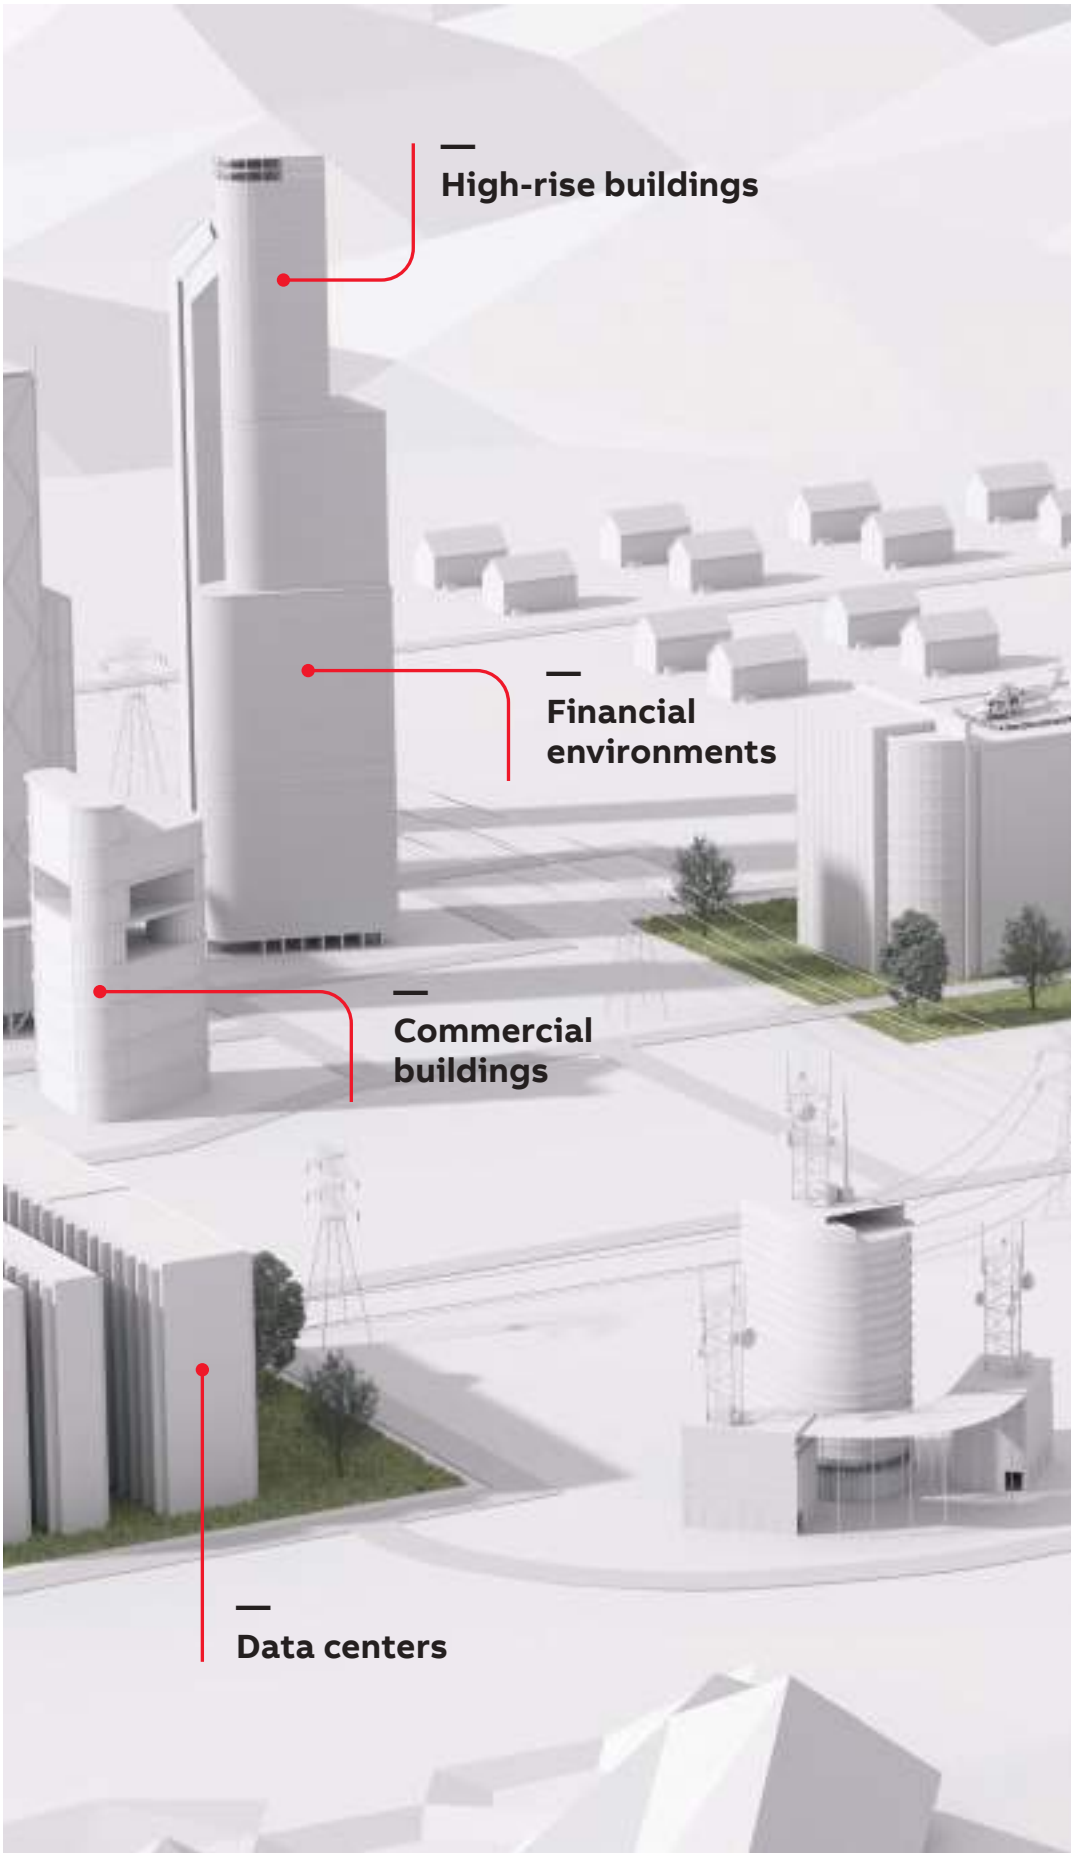


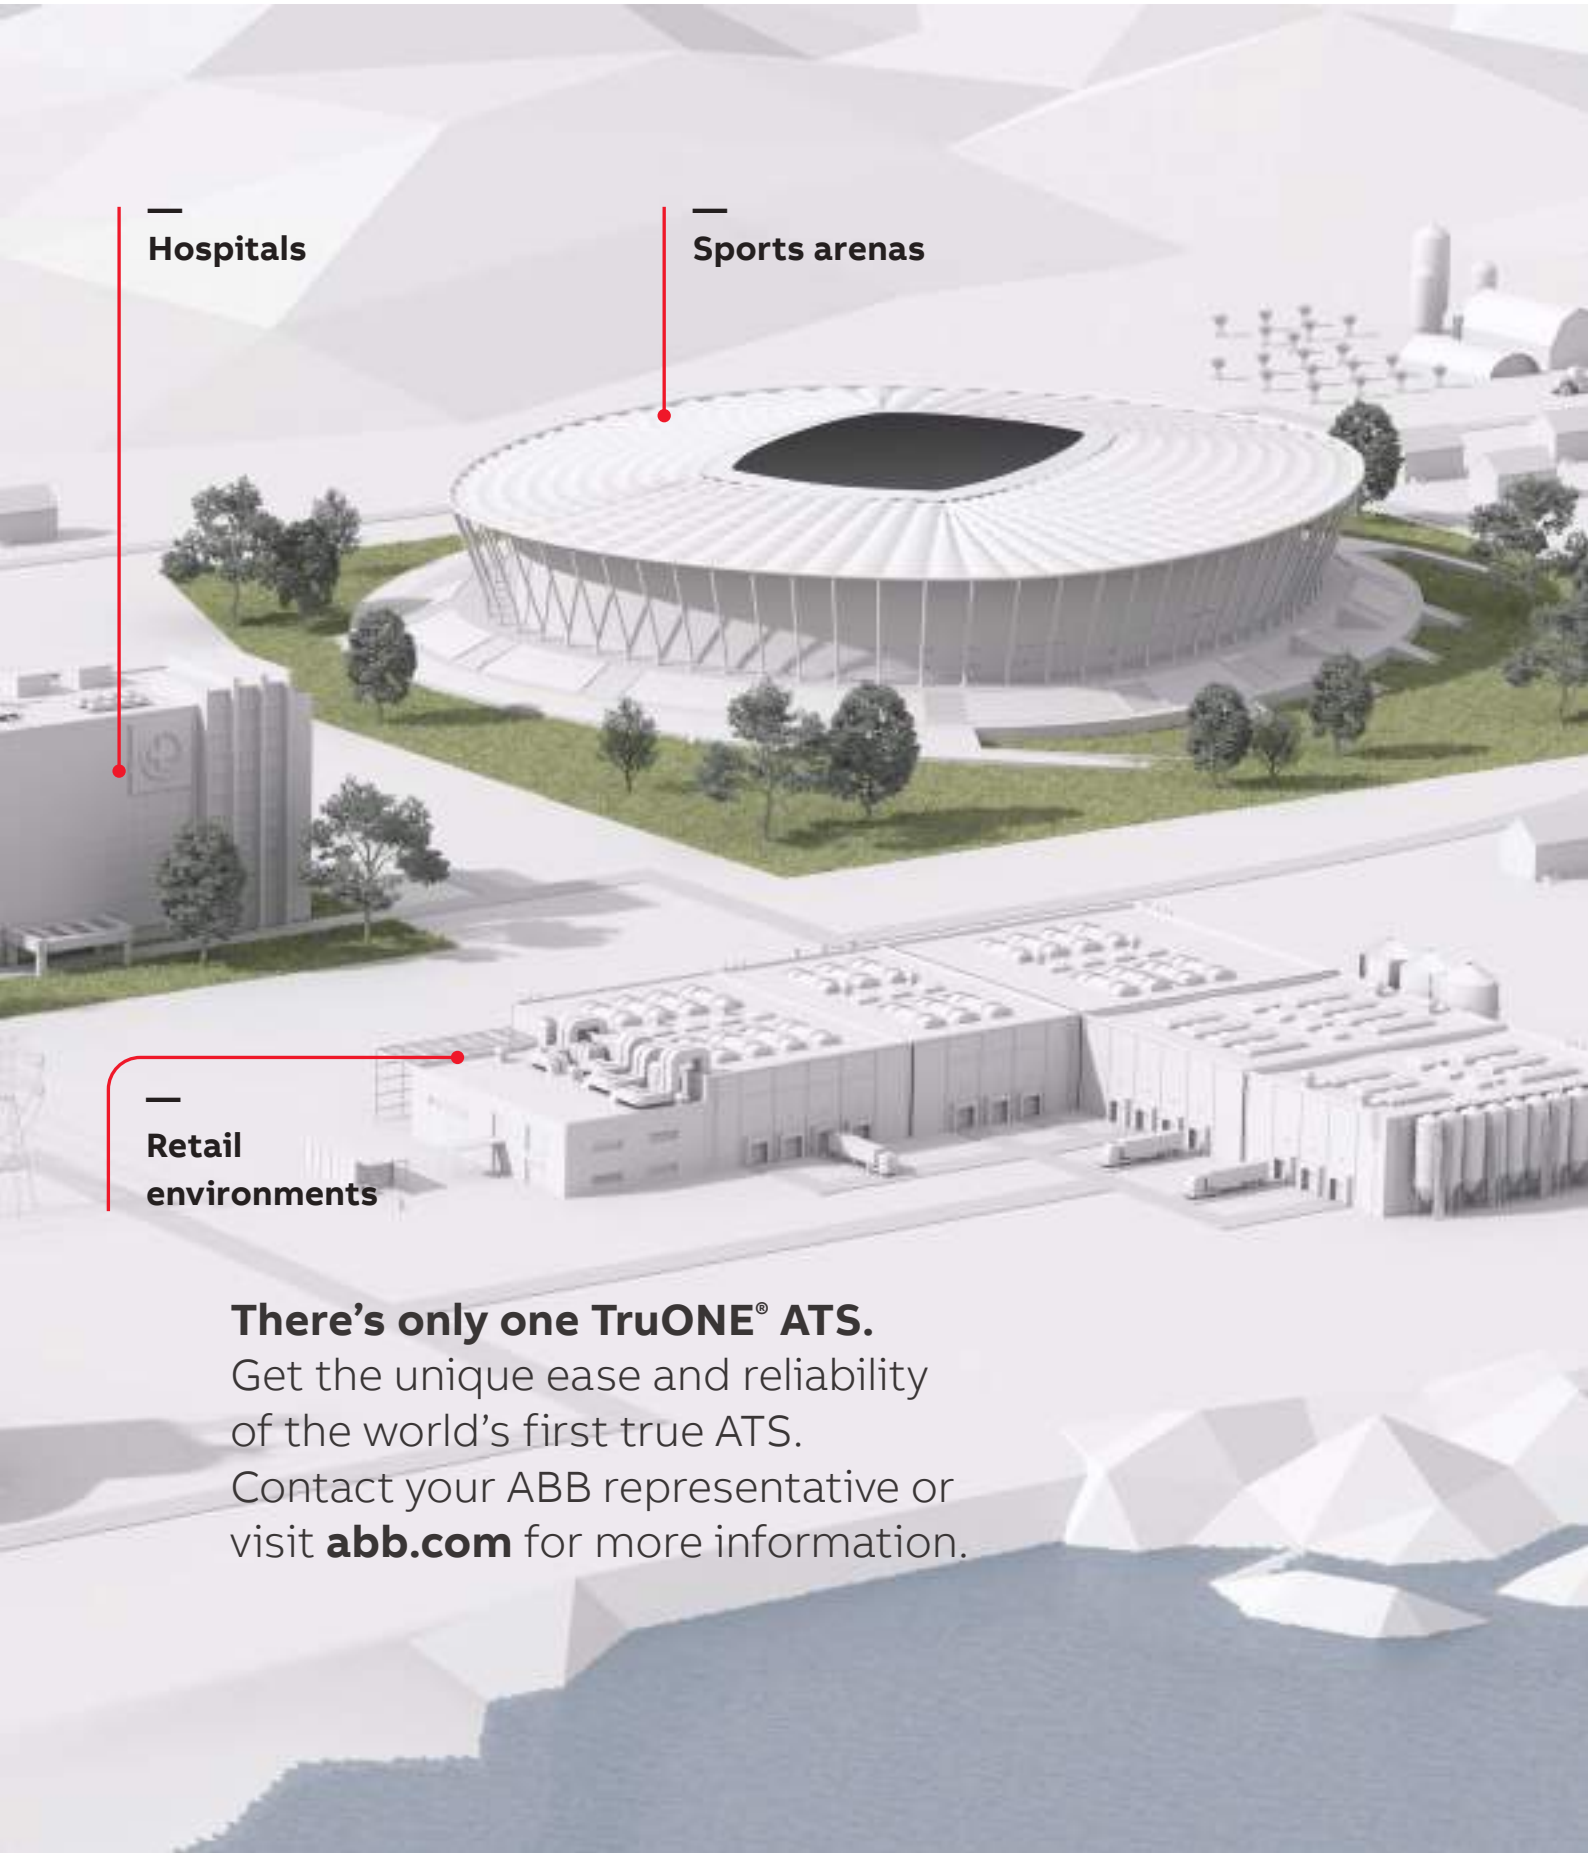
The one ATS for all applications

Bring the highest level of convenience, efficiency and critical power security to your product, project or facility.

TruONE® is the superior solution for:
- Genset OEMs
- Panel builders
- Consultants and engineers
- Contractors
- Facilities managers

TruONE® provides superior critical power security for:
- Hospitals
- Sports arenas
- Retail environments
- High-rise buildings
- Commercial buildings
- Financial environments
- Data centers
- And more





There's only one TruONE® ATS.
Get the unique ease and reliability of the world's first true ATS. Contact your ABB representative or visit **abb.com** for more information.

TruONE® part number key

An example and product description: ABB TruONE® automatic transfer switch, open transition, 800 amperes, UL, 3 phase + Neutral (3ph, 4 wire), Level 4 controls, 200–480 VAC voltage area, open style, bottom entry (sources on bottom, load on top).

ABB Brand

OX	ABB TruONE® ATS

ATS type

A	Open transition I - II (without stable OFF position for load disconnection)
B	Delayed transition I - O - II (with stable OFF position for load disconnection)

Phase poles

1	1-pole
2	2-pole
3	3-pole

Controller

2	Level 2 controls (DIP)
3	Level 3 controls (LCD)
4	Level 4 controls (Touch)

ATS size (A)

UL sizes	30, 60, 100, 125, 160, 200, 260, 400, 600, 800, 1000, 1200
IEC sizes	200, 250, 315, 400, 500, 630, 800, 1000, 1250, 1600

Standard

E	IEC
U	UL

Voltage code

Q	200–480 VAC

Enclosure rating

blank	Open style, no enclosure
54	Enclosed style, IP54

Neutral

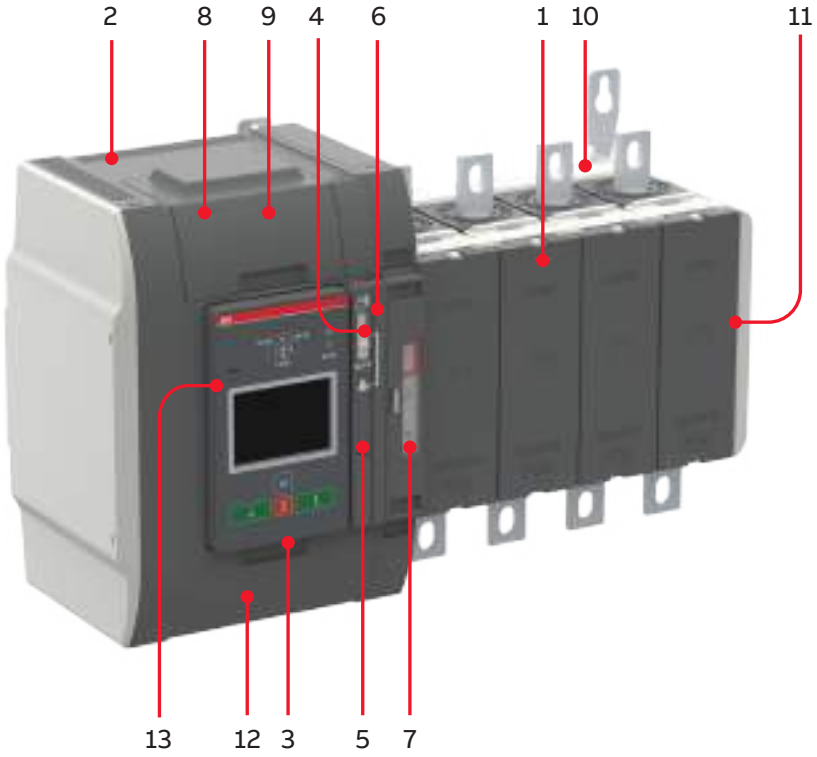
S	Switched Neutral
O	Overlapping Neutral
X	None

Cabling direction

Open style, no enclosure	
B	Bottom entry (sources on bottom, load on top)
T	Top entry (sources on the top, load on the bottom)
Enclosed style	
B	Bottom entry (all cable entries from bottom - source 1, source 2 and load)

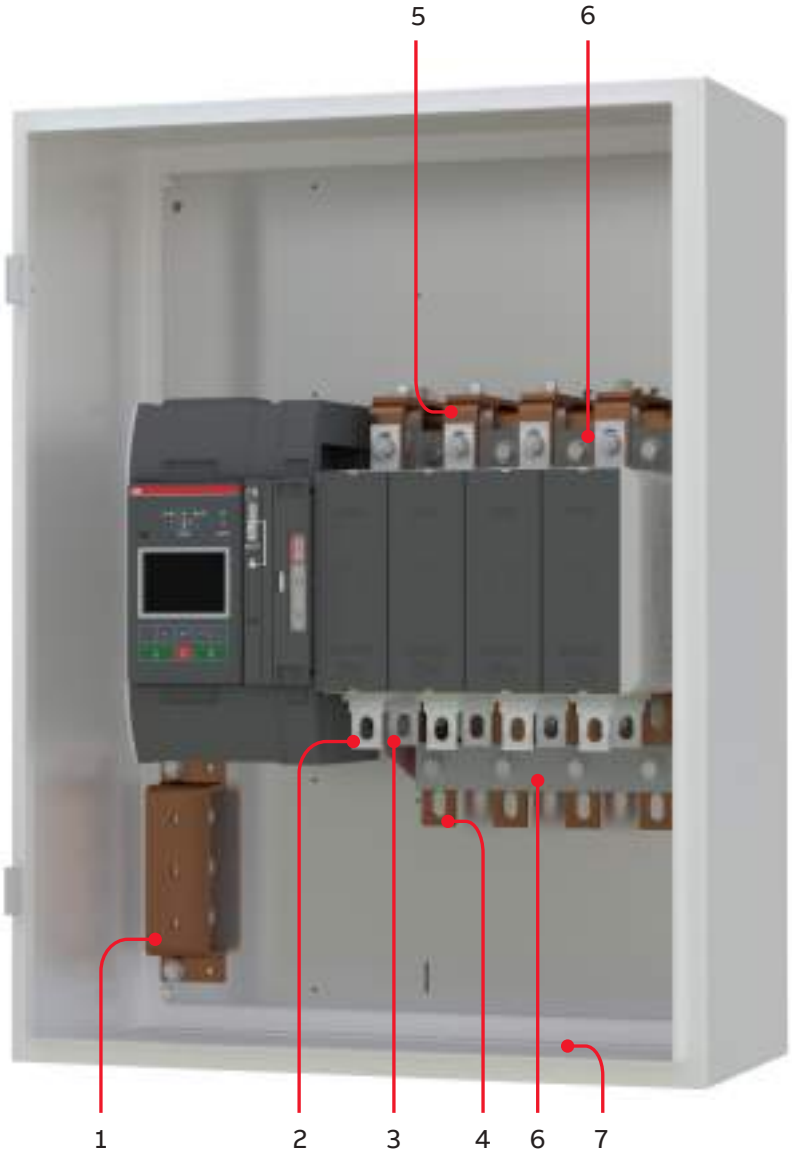
Note: For available configurations, see the ordering information pages.

TruONE® general overview



1. Automatic transfer switch
2. Embedded ATS control unit and solenoid operating mechanism
3. Detachable HMI unit, three types of control interfaces Level 2 (DIP), Level 3 (LCD) and Level 4 (Touch)
4. Slide switch (Hand - Locking - AUTO) for selection of the operation mode
5. Padlocking the automatic transfer switch to prevent automatic and manual operation
6. Handle for manual operation
7. Position indication
8. Terminals for control circuit connections (behind the cover)
9. Place for connectivity modules (aux power supply, communication and signaling)
10. Place for sensor module (included as standard with Level 4 controls)
11. Place for auxiliary contact block
12. Location of product identification label
13. Programming port, only for Ekip Programming module and Ekip Connect software

Enclosed TruONE® ATS general overview



1. PE - terminal (3 pole versions include also neutral bar)
2. Source 2 terminals
3. Source 1 terminals
4. Load terminals
5. Load side pre-mounted busbars (with sizes 315-1250 A)
6. Busbar support
7. Cable entry (one large flange)

Description of basic functionality

Operation of time delays and corresponding relay output signals

Example for SOURCE 1 Priority
SOURCE 2 = Generator

Switching sequence summary:

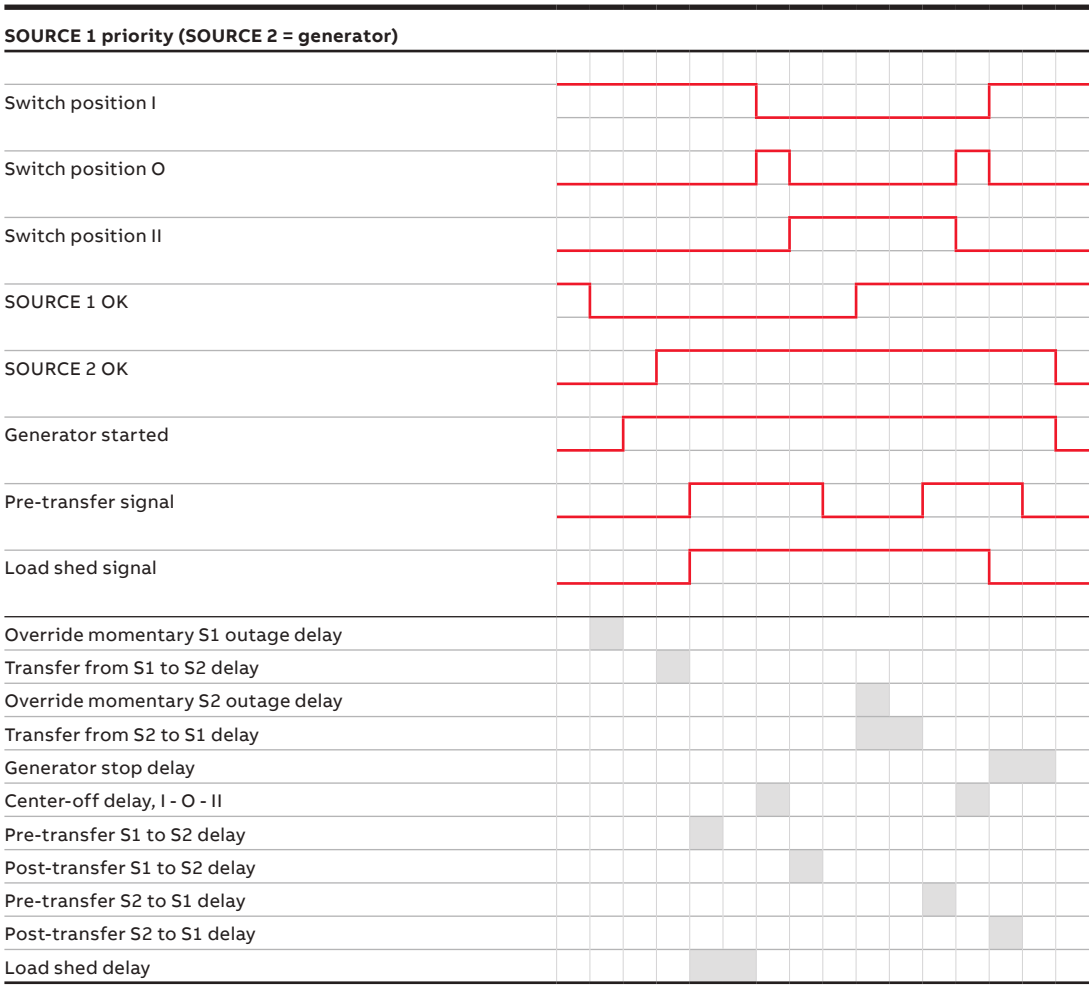
- An anomaly occurs on the SOURCE 1
- Override momentary S1 outage delay
- Generator start
- SOURCE 2 OK
- Transfer from S1 to S2 delay
- Pre-transfer signal on
- Load shed signal on
- Pre-transfer S1 to S2 delay
- Load shed delay
- Transfer switch to the position O (only with delayed transition I-O-II type and at least one phase exists in SOURCE 1)
- Center-Off delay (only with delayed transition I-O-II type, delay is zero when all phases are missing in SOURCE 1)
- Transfer switch to the position II (SOURCE 2)
- Post-transfer S1 to S2 delay
- Pre-transfer signal off

Retransfer sequence summary:

- The SOURCE 1 is restored
- Transfer from S2 to S1 delay
- Pre-transfer signal on
- Pre-transfer S2 to S1 delay
- Transfer switch to the position O (only with delayed transition I-O-II type)
- Center-off delay
  (only with Delayed transition I - O - II type)
- Transfer switch to the position I (SOURCE 1)
- Load shed signal off
- Generator stop delay
- Post-transfer S2 to S1 delay
- Pre-transfer signal off
- Generator stop
- SOURCE 2 off

Video: Transfer from primary to backup power

Video: Transfer from backup to primary source after power is restored



Description of basic functionality

Operation of time delays and corresponding relay output signals

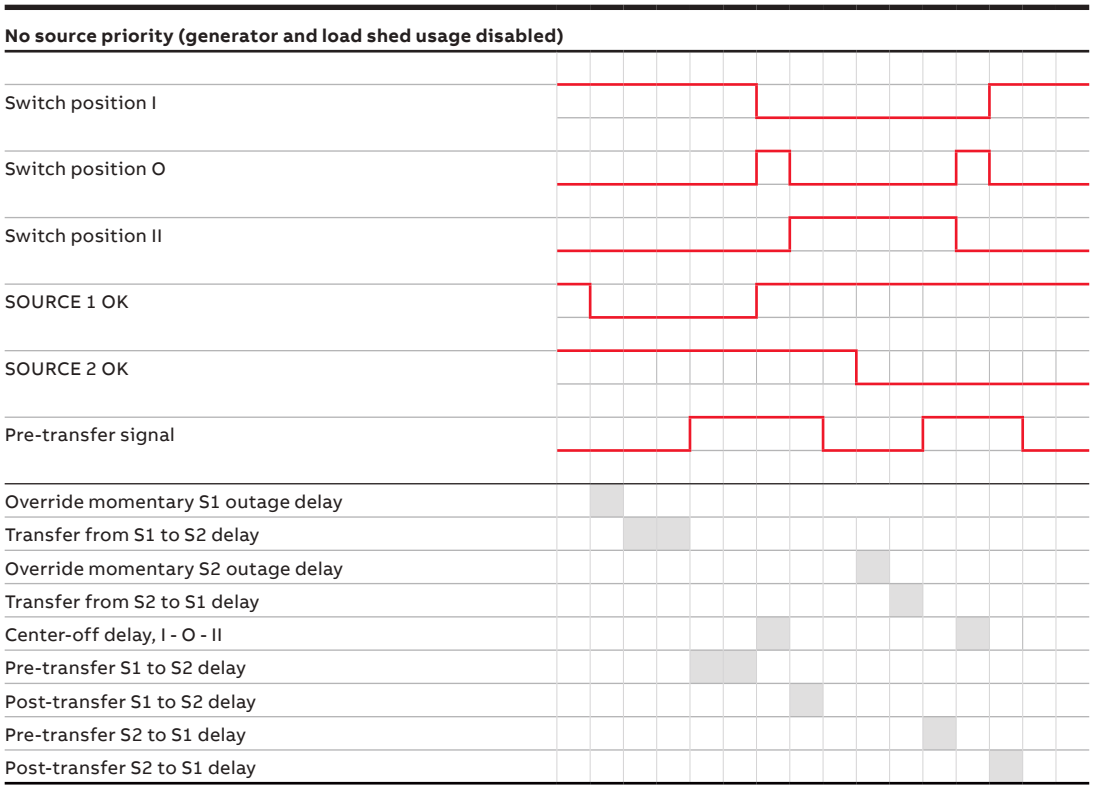
Example for Mains - Mains, No Source Priority

Switching to available source:

- An anomaly occurs on the SOURCE 1
- Override momentary S1 outage delay
- Transfer from S1 to S2 delay
- Pre-transfer signal on
- Pre-transfer S1 to S2 delay
- Transfer switch to the position O (only with delayed transition I-O-II type and at least one phase exists in SOURCE 1)
- Center-Off delay (only with delayed transition I-O-II type, delay is zero when all phases are missing in SOURCE 1)
- Transfer switch to the position II (SOURCE 2)
- Post-transfer S1 to S2 delay
- Pre-transfer signal off

Retransfer steps following anomaly in the source functioning:

- The SOURCE 1 is restored
- An anomaly occurs on the SOURCE 2
- Override momentary S2 outage delay
- Transfer from S2 to S1 delay
- Pre-transfer signal on
- Pre-transfer S2 to S1 delay
- Transfer switch to the position O (only with delayed transition I-O-II type and at least one phase exists in SOURCE 2)
- Center-Off delay (only with delayed transition I-O-II type, delay is zero when all phases are missing in SOURCE 2)
- Transfer switch to the position I (SOURCE 1)
- Post-transfer S2 to S1 delay
- Pre-transfer signal off



Note: The functionality and sequence of 'Elevator pre- and post-signals' is equivalent to 'Pre- and Post-transfer' features.

Open transition with overlapping neutral – Open style, Level 3 controls

I-II –operation without stable OFF position between positions I and II.
Overlapping neutral means the neutral will not be disconnected from the load when transferring from source to another. Overlapping neutral pole is always on the right side (1st pole from the right). Delivery includes handle for manual operation, 2 m connection cable between detachable HMI and ATS frame.
Terminal connection kits (bolts, nuts and washers) and mechanical lugs available as accessory.

Bottom entry - Source 1 and Source 2 connections on bottom, load connections on top

Open transition with overlapping neutral – Open style, Level 4 controls

I-II –operation without stable OFF position between positions I and II.
Overlapping neutral means the neutral will not be disconnected from the load when transferring from source to another. Overlapping neutral pole is always on the right side (1st pole from the right). Delivery includes handle for manual operation, 2 m connection cable between detachable HMI and ATS frame.
Terminal connection kits (bolts, nuts and washers) and mechanical lugs available as accessory.

Bottom entry - Source 1 and Source 2 connections on bottom, load connections on top

Automatic transfer switches

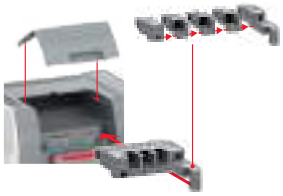
Auxiliary power supply module

OXEA1

The OXEA1 auxiliary power supply module is used for: a) connecting connectivity modules (signalling and communication) to the switch b) powering the ATS controller and connectivity modules from auxiliary 12-24 Vdc power supply, to keep them operational during power failures. 12-24Vdc power supply is not required when line power is available but it is necessary to keep the modules operational during power failures.

Suitable for switches	Aux voltage	Type	Order number	Weight /unit kg
OX30...1600	12-24Vdc	OXEA1	1SCA148926R1001	0.04

Connectivity modules



The connectivity modules are used in combination with OXEA1 auxiliary power supply module to enable communication capabilities (Ekip Com modules) and increase the number of digital inputs and outputs (Ekip Signalling modules). The maximum number of additional modules depends on the TruONE switch size: IEC 200-400 Amps and UL 30-260 Amps can fit three additional modules and IEC 500-1600 Amps and UL 400-1200 Amps can fit four additional modules. These modules are available with TruONE Level 3 and Level 4 controllers.

Communication modules for Level 3 and Level 4 controllers

EKIP COM

The Ekip Com modules enable TruONE to be integrated in an industrial communication network for remote supervision and control of the switch. Several Ekip Com modules can be installed at the same time, thereby enabling connection to communication systems that use different protocols. The Ekip Com modules for Modbus RTU, Profibus-DP and DeviceNet contain a terminating resistor and dip switch for optional activation to terminate the serial network or bus. The Profibus-DP module also contains a polarization resistor and dip switch for its activation.

Suitable for switches	Protocol	Type	Order number	Weight /unit kg
OX30...1600	Modbus RTU	Ekip Com Modbus RTU-OX	1SDA104051R1	0.2

EKIP 2K SIGNALLING

Signalling modules for Level 3 and Level 4 controllers

The Ekip 2K Signalling modules add two input and two output contacts for controlling and remote signalling. They can be programmed with the HMI unit's display or with the Ekip Connect software. Three versions of the Ekip 2K Signalling modules are available: Ekip 2K-1, Ekip 2K-2, Ekip 2K-3. Simultaneous usage of same types is not possible. For customers who require more than 2 inputs or 2 outputs add on modules can be purchased which provide sequential labeling of the contact points. Adding 2K-2 allows for 4 inputs and 4 outputs and then adding Ekip 2K-3 allows for a total of 6 inputs and 6 outputs.

Suitable for switches	No. of DI/DO	DI/DO numbering	Type	Order number	Weight /unit kg
OX30...1600	2/2	11,12/11,12	Ekip Signalling 2K-1-OX	1SDA104053R1	0.2
OX30...1600	2/2	21,22/21,22	Ekip Signalling 2K-2-OX	1SDA104054R1	0.2
OX30...1600	2/2	31,32/31,32	Ekip Signalling 2K-3-OX	1SDA104055R1	0.2

EKIP PROGRAMMING

Ekip Programming module

The Ekip Programming module is used for programming TruONE via USB to a PC using the Ekip Connect software that can be downloaded online. It enables both online (line power available) and offline (no line power available) programming. Available for TruONE Level 2, Level 3 and Level 4 controllers.

Suitable for switches	Type	Order number	Weight /unit kg
OX30...1600	Ekip Programming	1SDA076154R1	0.2

Accessories

Automatic transfer switches

Ekip Com Hub

EKIP COM HUB

Ekip Com Hub is a communication module for cloud-based connectivity through the ABB Ability™ Energy and Asset Manager.
TruONE equipped with Ekip Com Hub can establish the connection to ABB Ability for the whole low-voltage power distribution panel. This cartridge-type communication module just needs to be inserted into TruONE and connected to the Internet.
For further information related to ABB Ability and Energy and Asset Manager, please visit the website .
Available for TruONE Level 3 and Level 4 controllers.

Suitable for switches	Type	Order number	Weight /unit kg
OX30...1600	Ekip Com Hub	1SDA082894R1	0.2

Terminal shrouds

Snap-on mounting, IP 20. A kit includes three or four shrouds that can be used on both top and bottom of the switch. Order two sets to cover both top and bottom terminals.

Description	Code	Units/type [pcs]
Brackets for wall fixing	AA1206	4

Note: This code is only for spare part purposes as the brackets are already included in the enclosed style standard delivery.

Technical data

Technical data - IEC

TruONE ATS OX200…1600E, open style

General performance

				Switch size				
Data according to IEC 60947-6-1 (Class PC equipment)				**OX200**	**OX250**	**OX315**	**OX400**	**OX500**
Rated insulation voltage, Ui (power circuit)			V	1 000				
Rated insulation voltage, Ui (electronics)			V	500				
Rated frequency, f			Hz	50 - 60				
Rated impulse withstand voltage, Uimp (power circuit)			kV	8		12		
Rated impulse withstand voltage, Uimp (electronics)			kV	6				
Conventional free air thermal current, Ith	/ ambient 40°C		A	200	250	315	400	500
Conventional enclosed thermal current, Ithe	/ ambient 40°C		A	200	250	315	400	500
Minimum enclosure size or equivalent volume		W x H x D	mm	600 x 800 x 300				
Contact transfer time I-II, II-I	Load interrupting time		ms	<50				
Operating transfer time I-II, II-I			ms	<500				
ATS current draw during transfer / time duration			A / ms	37 /<110				40 / <130
Mechanical endurance	No. of operating cycles[3]			6012	6012	4012	4012	3012
Power loss / pole			W	5.8	9.7	12.1	20.3	17.2
Overvoltage category				III				
Pollution degree (control circuit)				PD 3 up to 415 V / PD 2 up to 500 V				
Environment category				E				
Minimum conductor cross section	Cu		mm^2	95	120	185	240	2x150
Terminal bolt size	Metric thread diameter x length		mm	M8 × 25	M8 × 25	M10 × 30	M10 × 30	M12 × 40
Terminal tightening torque	Counter torque required		Nm	15...22	15...22	30...44	30...44	50...75
Weight without accessories	2-pole switch		kg	12.4	12.4	13.3	13.3	16.9
	3-pole switch		kg	14	14	15.4	15.4	19.1
	4-pole switch		kg	15.6	15.6	17.5	17.5	21.4
Suitable for applications				Transformer - Transformer, Transformer - Generator[4]				

2 pole construction - Operating performance and short-circuit capability

				Switch size				
Data according to IEC 60947-6-1 (Class PC equipment)				**OX200**	**OX250**	**OX315**	**OX400**	**OX500**
Rated operational voltage, U			Vac	200 - 240				
Operating voltage range, U			Vac	160 - 288				
Rated operational current, AC-31B		up to 240 V	A	200	250	315	400	500
Rated operational current, AC-33B		up to 240 V	A	200	250	315	400	500[1]
Rated breaking capacity in category AC-33		up to 240 V	A	2000	2500	3150	4000	5000[1]
Rated conditional short-circuit current Iq (r.m.s.) and corresponding protective devices (fuse or circuit breaker)[7]	Iq (r.m.s.) 100 kA, 240 V	$\hat{i}_c$ (peak)[5]	kA	39	39	56	56	90
	Max. OFA_ fuse size	gG/aM	A/A	315	315	500	500	1000
	Iq (r.m.s.) 50 kA, 240 V							
	ABB circuit breaker type			T5L630	T5L630	T5L630	T5L630	T6L1000
Rated short-time withstand current	Icw (r.m.s.)	240 V 0.1s	kA	12	12	18	18	18
	Icw (r.m.s.)	240 V 0.3s	kA	12	12	18	18	18
	Icw (r.m.s.)	240 V 0.5s	kA					18
Rated short-time making capacity[2]	Icm peak	240 V	kA	24	24	36	36	36

3 and 4 pole construction - Operating performance and short-circuit capability

				Switch size				
Data according to IEC 60947-6-1 (Class PC equipment)				**OX200**	**OX250**	**OX315**	**OX400**	**OX500**
Rated operational voltage, U			Vac	200 - 415				
Operating voltage range, U			Vac	160 - 576				
Rated operational current, AC-31B		up to 415 V	A	200	250	315	400	500
Rated operational current, AC-32B		up to 415 V	A	200	250	315	400	500
Rated operational current, AC-33B		up to 415 V	A	200	250	315	400	500
Rated breaking capacity in category AC-33		up to 415 V	A	2000	2500	3150	4000	5000
Rated operational current, AC-33iA[6]		up to 415 V	A	125	125	250	250	500
Rated conditional short-circuit current Iq (r.m.s.) and corresponding protective devices (fuse or circuit breaker)[7]	Iq (r.m.s.) 100 kA, 500 V	$\hat{i}_c$ (peak)[5]	kA	49	49	69	69	90
	Max. OFA_ fuse size	gG/aM	A/A	400 / 400	400 / 400	630 / 630	630 / 630	1000 / 1000
	Iq (r.m.s.) 50 kA, 500 V							
	ABB circuit breaker type			T5L630	T5L630	T6L630	T6L630	T6L1000
	Iq (r.m.s.) 85 kA, 500 V							
	ABB circuit breaker type							
Rated short-time withstand current	Icw (r.m.s.)	415 V 0.1s	kA	18	18	25	25	42
	Icw (r.m.s.)	415 V 0.3s	kA	18	18	25	25	30
	Icw (r.m.s.)	415 V 0.5s	kA					30
Rated short-time making capacity[2]	Icm peak	415 V	kA	36	36	52.5	52.5	89

[1] OX_B bottom entry versions only
[2] Short circuit duration > 50ms, without fuse protection
[3] Operating cycle: O - I - O - II - O
[4] Contact ABB for applications with smaller than 20kVA gensets
[5] Cut-off current îc (peak) value. The cut-off current îc refers to values listed by fuse manufacturers (single phase test acc. to IEC60269).
[6] AC-33iA according to GB/T 14048.11

To learn more, look at the additional resources

The power of ONE – A critical breakthrough for critical power

TruONE ATS is the world's first true all-in-one automatic transfer switch, engineered to incorporate switch and controller in one seamless unit.

TruONE, true versatility

With TruONE, you have true versatility.

Manual and automatic operation

TruONE allows emergency manual operation under load, if necessary, for immediate power restoration.

Simplicity vs. Complexity

Are you ready to replace complexity with simplicity? Then you are ready for TruONE, the world's first true, purpose-built ATS.

Installation of accessories

TruONE features plug-in factory and field-mount accessorizing, so you don't need extra space inside the panel.

Installation of HMI on panel door

One wire, not 20. TruONE is the first automatic transfer switch to put it all together, including the controller with detachable HMI. It can be installed with a single wire using standard enclosures.

Sequence of operation and time delays

Part 1

Part 2

Learn how TruONE ATS operate, what time delays can be programmed and how the time delays make the transfer safe and reliable. The part 1 shows transfer from primary to backup power, the part 2 shows backup to a primary power source after power has been restored.

E-Configure

The easiest way to find, select, configure and order ABB products, quickly and simply.

Virtual HMI - Level 2 controller

Look at the available functions with the TruONE ATS Level 2 HMI.

Virtual HMI - Level 4 controller

Browse through the ATS functions and modify settings just like with a real TruONE ATS Level 4 HMI.
