Railroad Traffic Signs

Railroad specific signs are highly durable and visible in day or night conditions. Made in both blue and red, these new signs help you comply with the Federal Railroad Administration and OSHA regulations. In the railroad industry, blue is the traditional color for "STOP", and has been used in the rail industry to indicate protection of parked rail cars and the crews working on them. Red is also acceptable for OSHA compliance, as some states and local railroad regulations require red signs on industrial sidings (a low-speed track section).

Sign Selection Guide

Reflective aluminum rail signs are made of .080 inch thick engineer grade reflective aluminum (B-959) unless otherwise noted.

Road Construction Traffic Signs

Brady construction signs warn employees, pedestrians and visitors of the potential dangers of road or parking lot construction areas. These roll-up bright orange construction signs indicate temporary road closings, detours, shoulder work and more. Included flexible fiberglass frames fit into plastic or sewn corner pockets to achieve maximum performance, even in the windiest conditions.

Sign Selection Guide

Mesh - Non-reflective mesh

Regulations

Federal MUTCD Standard:

No person shall install or maintain in any area of private property used by the public any sign, signal, marking or other device intended to regulate, warn or guide traffic unless it conforms to the MUTCD.

Traffic Signs and Reflectivity Section 2A.0702 of MUTCDs

Stipulates that regulatory, warning, and guide signs and object markers shall be retroreflective or illuminated to show the same shape and similar color by both day and night. Most of Brady's retroreflective signs are "engineer grade". Higher intensity "Diamond Grade" signs are available as custom options.

All posts used for mounting must be breakaway style and mounted at new minimum mounting heights

All supports require breakaway sockets or posts. Minimum mounting height is 5' from the bottom of the sign to the top of the ground in rural or low-volume areas. Minimum mounting height is 7' from the bottom of the sign in urban or heavily traveled areas.

Notice: Chock Rear Wheels 1910.178(k) and (m)

When trucks are loaded and unloaded, OSHA requires the brakes to be set and wheel chocks to be placed under the rear wheels to prevent the trucks from rolling while they are boarded with a forklift or other powered industrial truck.
