

LynxPOWER™
Passive connectivity solutions

CROUSE-HINDS
SERIES

Dependable connectivity
for power & control

EATON

Powering Business Worldwide

Realize time and cost savings with LynxPOWER™ industrial connectivity.

When operating efficiency and manufacturing uptime are critical, Eaton's Crouse-Hinds' extensive offering of industrial connectivity products simplify installations and change-outs for power and signal applications.

Improve the efficiency, safety and uptime of your facility with LynxPOWER™ industrial connectivity solutions.

- Designed specifically to withstand industrial manufacturing environments
- Lowers maintenance and facility costs due to quick and easy change-out modular design
- Keyed to ensure accurate and safe connections every time
- Customized configurations to meet your specific application

Core cordsets stocked in our Roanoke distribution center for fast delivery.

Mini-Line

Cable jacket characteristics selector guide

Cable Designation	Cable Jacket Type	Product Line	Voltage Rating	Typical Application
STOOW	PVC	Mini-Line	600	Material Handling
SOOW	Rubber	Mini-Line	600	Washdown, Flexibility
SEOW	Thermo-plastic Elastomer (TPE)	Mini-Line	600	Manufacturing Process
SJTOOW	PVC (UL AWM Style 2661)	Micro-Mini	300	Material Handling

Cable Nomenclature

S	Service Grade (also means extra hard service when not followed by J, V, P)
J	Junior Cable Grade (rated for 300V) for Hard Service
T	Thermo-plastic Material PVC

Cable Nomenclature

E	Thermoplastic Elastomer Material (UL/NEC only)
O	Oil-Resistant Cable Jacket
OO	Oil-Resistant Cable and Individual Conductors Jackets
W	Weather (Outdoors) Resistant

Stock and custom connectivity solutions for your unique applications

Stock items

Many of our LynxPOWER™ products are in stock and available for immediate purchase and quick delivery. Contact your Eaton's Crouse-Hinds sales representative for a full list of products.

Made to order

Parts not listed in our catalog may be available as a made to order item. Consult factory for availability and lead times.

Mini-Line Applications

A complete line of connectivity solutions to meet your specific needs

Application

Mini-Line products are specifically designed for industrial automation applications in which power or signal connections are exposed to long-term physical stresses and subjected to liquids or oils.

Mini-Line is ideal for industrial manufacturing, production line equipment, packaging equipment, conveyors and assembly lines, plus food and beverage processing equipment.

Mini-Line connection points mean less downtime, easier maintenance and increased safety by replacing traditional hard wiring with a plug-and-run modular pre-wired system.

These products have excellent resistance to welding flash, hot chips and other severe conditions found in demanding manufacturing settings.

The molded-to-cable construction of the one-piece cordset ends creates a bond that is impervious to penetration from external contaminants.

Select from a wide range of standard and custom Mini-Line cordsets and receptacles in a variety of configurations, as well as plex boxes and accessories.

Mini-Line

Features & Benefits

Quality, dependable connectivity solutions for today's industrial applications

Mini-Line Cordsets and Receptacles are designed for modular use in abusive applications where cable assemblies are exposed to constant flexing and/or dirty, oily or harsh environments.

Accessories

Whether you need to create complex power, signal networks or simply add another drop connection, we have the Mini-Line adapters and accessories you need.

Industrial Connectivity

Mini-Line Cordsets

Features

- Factory molded-to-cable cordsets provide quick connect capability.
- Modular components allow for easy expansion and reconfiguration without the need for rewiring; eliminates the need for multiple cable assemblies, reduces installation time, reduces design time and lessens the need for special tools.
- Environmentally sealed ends rated at IP68 to prevent the ingress of dust, water and other contaminants to reduce maintenance and downtime.
- Vibration-resistant ratchet couplers assure cordsets stay connected under load.
- Superior female contact design with stainless steel sleeve for minimal degradation.
- End-to-cable molded junction securely bonds for excellent reliability.
- Internal contact support maintains pin location and proper keyway alignment.
- Shroud and cork design exceeds IP68 and NEMA 6P rating (rated 1,200 PSI hose down spray).
- Easy-stripping jacketed cable design allows fast stripping with simple hand tools; high-flex copper stranding delivers improved flexibility; multiple cable options.

Certifications

- NEMA 1, 3, 4, 6P and 13
- IEC IP68

Testing & Code Compliance

- UL Listed 2238, File No. E468986
- CSA certified File No. LR13963

Micro-Mini Applications

When customized connections are critical to your operation

Application

Micro-Mini products are specifically designed for industrial automation applications that expose signal connections to constant flexing and vibration, plus contaminants, hot chips or welding flash.

Micro-Mini are ideal for industrial manufacturing, production line equipment, pick-n-place machines, robotic equipment and processing sensors.

Micro-Mini products are designed specifically for low amperage AC or DC control systems, compatible with pin configurations used by major sensor manufacturers in the U.S. and Europe, and meet current SAE H1738-2 and IEC 60176-2-101 specifications.

The molded-to-cable construction of the one-piece cordset ends creates a bond that is impervious to penetration from external contaminants.

Receptacle shells are made from materials chosen to mate with Micro-Mini cordsets and provide a cable assembly with far superior service.

Our broad selection of Micro-Mini products have been specifically designed for low amperage AC or DC control systems and are ideally suited for use in harsh and abusive manufacturing environments.

Micro-Mini

Features & Benefits

The ideal connectivity solution for sensor and control devices

Micro-Mini (M12) for DC circuits cordsets and receptacles are specifically designed for sensor and control equipment used in today's manufacturing environments.

Micro-Mini Cordsets AC Dual Key

Features

- Designed for low amperage control systems in abusive manufacturing environments.
- Factory molded-to-cable ends provide quick connect capability.
- Modular components allow for easy expansion and reconfiguration without the need for rewiring; eliminates the need for multiple cable assemblies, reduces installation time, reduces design time and lessens the need for special tools.
- Environmentally sealed ends rated at IP68 to prevent the ingress of dust, water and other contaminants to reduce maintenance and downtime; internal gasket assures watertightness.
- Vibration-resistant ratchet couplers assure cordsets stay coupled under load.
- Contact inserts securely bonded in place with a proprietary process; superior side load strength is in excess of 100 lbs., 5 times industry standards.
- End-to-cable molded junction securely bonds for excellent reliability.
- Gold-plated contacts provide superior conductivity and corrosion resistance.
- Easy-stripping jacketed cable with "fillerless" design allows fast stripping with simple hand tools; high-flex copper stranding delivers improved flexibility; multiple cable type options

Standard Aluminum Shell.*

Micro-Mini Tees & Accessories

Features

- Factory molded tees offer quick and easy circuit branching options, eliminating the need for hardwired boxes.
- Tees are available with molded-to-cable drops as well as molded wiring harnesses with multiple drops.
- Compact body reduces the overall connectivity footprint.
- Flexible gender configurations allow the user to customize the product to fit their application.

Certifications

- NEMA 1, 3, 4, 6P and 13
- IEC IP68

Testing & Code Compliance

- UL recognized, cURus File No. E169897
- CSA certified File No. LR13963

Micro-Mini Tees & Accessories

Features

- Field attachable connectors allow users to quickly repair damaged molded cordsets.
- Allow users to create custom cordset lengths using their own cable.
- Optional 316 stainless steel couplers support food and beverage applications.
- Easy to use set screw terminals provide secure conductor to contact termination.

Certifications

- NEMA 1, 3, 4, 6P and 13
- IEC IP68

Testing & Code Compliance

- UL recognized, cURus File No. E169897

Cable Selector Guide

Cable jacket selector guide

Cable Characteristic	Cable Jacket Type	Product Line	Voltage Rating	Typical Application
STOOW	PVC	Mini-Line	600	Material Handling
SOOW	Rubber	Mini-Line	600	Wash Down
SEOW	Thermo-plastic Elastomer	Mini-Line	600	Manufacturing Process
SJTOOW	PVC (UL AWM Style 2661)	Micro-Mini	300	Material Handling Manufacturing

Cable Nomenclature	
S	Service Grade (<i>also means extra hard service when not followed by J, V, P</i>)
J	Junior Cable Grade (<i>rated for 300V for Hard Service</i>)
T	Thermo-plastic Material PVC
E	Thermoplastic Elastomer Material (<i>UL/NEC only</i>)
O	Oil-Resistant Cable Jacket
OO	Oil-Resistant Cable and Individual Conductors Jackets
W	Weather (<i>Outdoors</i>) Resistant

	PVC (STOOW & AWM)	CPE (SOOW & SJOOOW)	TPE (SEOW & SJEOW)
Service Temperature Range	-55° to +105°C	-40° to +105°C	-55° to +90°C
Oxidation Resistance	Excellent	Excellent	Outstanding
Heat Resistance	Good - Excellent	Excellent	Outstanding
Oil Resistance	Fair	Excellent	Outstanding
Low Temperature Flexibility	Poor - Good	Excellent	Outstanding
Weather/Sun Resistance	Good - Excellent	Excellent	Outstanding
Ozone Resistance	Excellent	Excellent	Excellent
Abrasion Resistance	Fair - Good	Excellent - Outstanding	Excellent
Electrical Properties	Fair - Good	Excellent	Excellent
Flame Resistance	Excellent	Excellent	Outstanding
Nuclear Radiation Resistance	Fair	Outstanding	Excellent
Water Resistance	Fair - Good	Outstanding	Excellent
Acid Resistance	Good - Excellent	Excellent	Excellent
Alkalai Resistance	Good - Excellent	Excellent	Excellent
Aliphatic Hydrocarbons Resistance (Gas, Kerosene, etc.)	Poor	Excellent	Excellent
Aromatic Hydrocarbons Resistance (Benzol, Toluol, etc.)	Poor - Fair	Good - Excellent	Excellent
Halogenated Hydrocarbons Resistance (Degreaser Solvents)	Poor - Fair	Excellent	Excellent
Alcohol Resistance	Poor - Fair	Excellent	Excellent
Weld Slag	Fair	Outstanding	Excellent

Enclosure Rating Systems

NEMA Rating

(National Electrical Manufacturers Association)

The NEMA rating indicates the level of protection the device has against water and dirt intrusion.

Protection from	Device Locations		
	Indoors	Indoors or outdoors	Outdoors with external mechanisms
Limited amounts of falling dirt	NEMA Type 1		
Limited amounts of falling dirt and dripping water	NEMA Type 2		
Rain, sleet, falling dirt, windblown dust, damage from ice formation		NEMA Type 3	
Rain, sleet, falling dirt, damage from ice formation		NEMA Type 3R	
Rain, sleet, windblown dust, ice laden operation possible			NEMA Type 3S
Windblown dust and rain, splashing water, hose-directed water, damage from ice formation		NEMA Type 4	
Corrosion, windblown dust and rain, splashing water, hose-directed water, damage from ice formation		NEMA Type 4X	
Falling dirt and settling airborne dust, lint, fibers and dripping non-corrosive liquids	NEMA Type 5		
Hose-directed water, entry of water during occasional short-term limited depth submersion, damage from ice formation		NEMA Type 6	
Hose-directed water, entry of water during long-term limited depth submersion, damage from ice formation		NEMA Type 6P	
Class I, Division 1, Groups A, B, C or D hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 7 <i>(commonly referred to as explosionproof)</i>		
Class I, Division 1, Groups A, B, C or D hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 8 <i>(commonly referred to as oil-immersed)</i>		
Class II, Division 1, Groups E, F and G hazardous locations (as defined by NEC®, NFPA 70)	NEMA Type 9 <i>(commonly referred to as dust-ignition-proof)</i>		
Meets applicable requirements of the Mine Safety & Health Administration, 30 CFR, Part 18		NEMA Type 10	
Circulating dust, falling dirt, dripping non-corrosive liquids	NEMA Type 12 NEMA Type 12K		
Dust, spraying of water, oil and non-corrosive coolant	NEMA Type 13		

Protection Codes

IP (Ingress Protection) Code Symbols

The chart below illustrates the use of special symbols in the IP classification system. The first digit of an IP number represents protection from solid objects and the second digit indicates protection from moisture.

1st Digit - Protection From Solid Objects

1	Protected against solid objects greater than 50 mm	
2	Protected against solid objects greater than 12.5 mm	
3	Protected against solid objects greater than 2.5 mm	
4	Protected against solid objects greater than 1 mm	
5	Dust protection	
6	Dust tight	

2nd Digit - Protection From Moisture

1	Protected against vertically dripping water	
2	Protected against dripping water when tilted up to 15°	
3	Protected against spraying water	
4	Protected against splashing water	
5	Protected against jetting water	
6	Protected against powerfully jetting water	
7	Protected against the temporary effects of immersion	
8	Protected against continuous submersion	

Example: **IP 54**

(5) Dust protection
 (4) Offers protected against splashing water
