

Bundling and Securing

Self-Affixing Clips

Solar I-Beam Clips

Effectively routes PV cables

The Solar I-Beam Clip is a cable routing device affixed to the top cross section of an I-beam pile to reduce potential abrasion damage to PV cabling during cable pull operations. The oversized edge clip design can be top loaded or rolled into position, making it easier to attach to the post even after panels have been installed and space is restricted. This top-of-beam clip accommodates a wide range of I-beam thicknesses from 0.125" to 0.50". The I-Beam Clip is easy to install, creates less wobble, holds more wires and has better side loading resistance.

Features and Benefits

- Wide-body design prevents wobble caused by the lateral strain created during wire pull activities.
- Tool-free installation saves time and reduces installation costs.
- Clip-on styling for easy installation, even in constrained spaces.
- Cradle arms guide cabling and prevent bundles from escaping during pulling operations.
- Cable tie saddle for cinching down bundles when install is complete.

MATERIAL	Polyamide 6.6 high impact modified, heat and UV stabilized (PA66HIRHSUV)
Operating Temperature	-40°F to +230°F (-40°C to +110°C)
Color	Black (BK)

PART NO.	TYPE	Max. Bundle Diameter in. (mm)	I-Beam Thickness in. (mm)	Height (H) in. (mm)	Width (W) in. (mm)	Color	Pkg. Qty.
151-04320	IBBCLPSLR1	2.0 (50.8)	0.125 - 0.5 (3.3 - 12.7)	4.53 (115.0)	4.7 (119.8)	Black	250

Dimensions are approximate and subject to technical changes. Use Part No. for ordering and Type for specification purposes.
