HelaGuard Nonmetallic Systems

HelaGuard is an innovative system of nonmetallic conduit, fittings and accessories that provides a highly versatile and lightweight solution for flexible cable management protection and routing needs. Available in a wide range of sizes, styles and materials, HelaGuard can address the wide array of mechanical, environmental and safety requirements needed for a project or application.

HelaGuard Nonmetallic Conduit

The self-extinguishing, halogen-free HelaGuard Conduit is preferred whenever conditions call for a lightweight, flexible material solution with good corrosion resistance properties. Standard and lightweight PA6 nylon conduit is widely used in OEM, electrical and general manufacturing environments. PA12 nylon conduit is well suited for dynamic applications that involve constant or repetitive motion — such as in industrial automation, or when exposed to UV conditions. Flame-retardant PA6 nylon is also available, along with a double slit version that is ideal for MRO and retrofitting applications. Most HelaGuard Nylon Conduit is UL recognized.

HelaGuard Nonmetallic Fittings

When fast installation and security is required, HelaGuard Nylon Fittings provide superior tensile strength with a simple snap-on and twist motion. All HelaGuard Fittings with the "HG" designation achieve an ingress protection rating of IP66 against dirt and moisture. When a higher degree of protection is required, "HGL" Fittings contain a special washer that fulfills IP68 classifications. Ultra® Fittings, with their one-piece design, deliver up to IP69 ingress protection. Types of nonmetallic fittings include straight fittings, elbows, flanges, T-Connectors, reducers and couplings. Compression fittings allow for ease of access to wires and cables for future maintenance.

Note: For product-specific approvals, please contact HellermannTyton or visit the product pages at www.hellermann.tyton.com.

Routing, Protection & Insulation

HelaGuard Nonmetallic Conduit

Applications

- Wire harness protection
- Medical equipment
- Conveyor systems
- Robotics and factory automation
- Machine construction and equipment
- Communication and security system cabling
- Industrial control panels
- Facility wiring

Key Features

- Wide range of sizes & materials
- Resistance to most chemicals
- High tensile strength
- Fast-fit design
- Liquid-tight system, IP65 up to IP69
- UV resistant materials
- Highly flexible

Benefits

- Suitable for broad range of applications
- Diverse applications
- Safe, secure assembly
- Easy installation, reduced assembly costs
- Meets industry standards
- Reliable protection against dust and water
- Suitable for outdoor applications
- Ease of use and installation

Mounting and Removing HelaGuard Nonmetallic Snap-On Fittings

HelaGuard Snap-On Fittings are mounted simply, quickly and securely. They offer exceptionally high pull-off strength and are vibration as well as tamper resistant. They can be removed with a screwdriver. HelaGuard Snap-On Fittings can be used again and again.

To mount and remove HelaGuard Snap-On Fittings, follow these simple instructions.

1. If the fitting has been used before, be sure that the slit points to the "on" position. To assemble the fitting, push it onto the end of the conduit as far as possible without forcing it, and twist it slightly. The fitting is now securely locked.

2. To remove the fitting, insert a small screwdriver into the slit.

3. Move the handle of the screwdriver towards the "off" position. The capnut will rotate slightly. The locking mechanism is now released.

4. Remove the screwdriver.

5. Manually rotate the capnut further toward the "off" position as far as possible.

6. Pull to remove the fitting from the end of the conduit.

To re-engage HelaGuard Snap-On Fittings, simply turn the capnut back to the "on" position and mount it onto the end of the conduit.

Routing, Protection & Insulation

HelaGuard Nonmetallic Conduit

System Nomenclature

Example

Conduit: HG-SW0500

Box colors above refer to the following chart colors below.

Product Line
HG = HelaGuard Nonmetallic Conduit & Fittings IP66
HGL = HelaGuard Nonmetallic Fittings IP68
HGU = HelaGuard Nonmetallic Ultra® Fittings IP66, IP67, IP68 and IP69

Conduit Description
SW = Standard Weight PA6 Nylon
SWSL = Standard Weight PA6 Nylon - Slit
LW = Lightweight PA6 Nylon
FR = Flame-retardant, Standard Weight PA6-FR Nylon
HI = High Impact, Standard Weight PA12 Nylon
HISL = High Impact Standard Weight PA12 Nylon – Slit
DC = Double Cut Conduit PA6 Nylon
PSR = Reinforced Spiral Tubing (PVC)
LPC = Reinforced Smooth Tubing (PVC)

Conduit Nominal Size
025 = 1/4" (10mm)
031 = 5/16" (13mm)
038 = 3/8" (16mm)
050 = 1/2" (21mm)
075 = 3/4" (28mm)
100 = 1" (34mm)
125 = 1-1/4" (40mm)
150 = 1-1/2" (50mm)
200 = 2" (67mm)

Color
0 = Black
8 = Gray

Example

Fittings: HGL075-S-0750

Fitting Style
S = Straight Fitting
45 = 45 Degree Elbow
90 = 90 Degree Elbow
T = T-Connector
SFL = Straight Flange Fitting
90FL = 90 Degree Flange
45FL = 45 Degree Flange
SM = Straight External Nickel-plated Brass Metric Thread
90M = 90 Degree Elbow External Nickel-plated Brass Metric Thread
45M = 45 Degree Elbow External Nickel-plated Brass Metric Thread
SF = Straight Internal Nickel-plated Brass Metric Thread
90F = 90 Degree Elbow Internal Nickel-plated Brass Metric Thread
45F = 45 Degree Elbow Internal Nickel-plated Brass Metric Thread
PSR = 2 Piece Nylon Compression Fitting
LPC-S = Metallic Compression Fitting for LPC Tubing NPT Thread

Fitting Size / Type
038 = 3/8" NPT Thread
050 = 1/2" NPT Thread
075 = 3/4" NPT Thread
100 = 1" NPT Thread
125 = 1-1/4" NPT Thread
150 = 1-1/2" NPT Thread
200 = 2" NPT Thread
M16 = 16mm Metric Thread
M20 = 20mm Metric Thread
M25 = 25mm Metric Thread
M32 = 32mm Metric Thread
M40 = 40mm Metric Thread
M50 = 50mm Metric Thread

HelaGuard Nonmetallic Conduit Guide

- Lightweight and flexible, with good impact, vibration and chemical resistance.
- Slit options allow for easy installation and maintenance.
- Corrugated conduit and smooth tubing options.

- Non-slit allows for liquid-tight ingress protection when paired with IP-rated fittings.
- UV resistant and flame-retardant options available.

Standard Weight Nylon Conduit (Slit & Non-Slit)

HG-SW & HG-SWSL Series, PA6

A Standard Weight Corrugated Conduit made of PA6 nylon that offers flexible abrasion protection for wire and cable bundles. Easy to cut and use, the material is highly resistant to solvents and oils. Combine with HelaGuard Nonmetallic Fittings for IP66 rating or greater protection against water, wind and dirt.

Features and Benefits

- Material is easy to use and cut; reduces installation time and labor costs.
- Flexible, abrasion resistant and durable for a variety of applications.
- Good impact strength; recovers quickly if crushed.
- UV resistant; suitable for use in outdoor applications.
- Offered in fine or coarse corrugated pitch.
- Offered with or without slit; slit options offer easy access during installation and maintenance.

HelaGuard Standard Weight for industrial applications.

Routing, Protection & Insulation

HelaGuard Nonmetallic Conduit

Lightweight Nylon Conduit

HG-LW Series, PA6

Lightweight Nylon Corrugated Conduit provides high flexibility and good mechanical protection of wire and cable bundles, especially useful in smaller bend radius tight-fit applications. PA6 material offers high resistance to oils and solvents, along with good abrasion protection. Combine with HelaGuard Nonmetallic Fittings for IP66 rating or greater protection against water, wind and dirt.

Features and Benefits

- Lightweight and highly flexible for use in tight bend and fit applications.
- Easy to use and cut; reduces installation time and labor costs.
- Good abrasion resistance and impact strength; recovers quickly if crushed.
- Offered in fine or coarse corrugated pitch.

HelaGuard Lightweight is very flexible; ideal for use in moving applications.

MATERIAL	Polyamide 6 (PA6)
Operating Temperature	-40°F to +248°F (-40°C to +120°C)
Operating Temperature Moving	-4°F to +212°F (-20°C to +100°C)
Flammability	Self-extinguishing according to EN IEC 61386

Note: For product-specific approvals, please contact HellermannTyton.

Flame-retardant Standard Weight Nylon Conduit

HG-FR Series, PA6-FR

A Standard Weight Corrugated Conduit made of a flame-retardant material for use in applications in which high fire protection and low flammability are primary requirements. Easy to cut and use, the material is highly resistant to solvents and oils. Combine with HelaGuard Nonmetallic Fittings for IP66 rating or greater protection against water, wind and dirt.

Features and Benefits

- Flame-retardant material; meets low flammability, smoke and toxicity ratings.
- Easy to use and cut; reduces installation time and labor costs.
- Flexible, abrasion resistant and durable for a variety of applications.
- Good impact strength; recovers quickly if crushed.
- Rated UL 94 V-0.
- UV resistant; suitable for use in outdoor applications.
- Offered in fine or coarse corrugated pitch.

Public buildings often require Flame-retardant HelaGuard due to its high fire protection properties.

MATERIAL	Polyamide 6, Flame-retardant (PA6-FR)
Operating Temperature	-40°F to +248°F (-40°C to +120°C)
Operating Temperature Moving	-4°F to +212°F (-20°C to +100°C)
Flammability	UL 94 V-0

Routing, Protection & Insulation

HelaGuard Nonmetallic Conduit

High-impact Standard Weight Nylon Conduit (Slit & Non-Slit)

HG-HI & HG-HISL Series, PA12

A Standard Weight Corrugated Conduit made of PA12 nylon that offers superior impact resistance, making it ideal for protecting wire and cable bundles in conditions with continual movement or bending. This material is highly resistant to UV light, solvents and oils. Combine with HelaGuard Nonmetallic Fittings to achieve IP66 or greater protection against water, wind and dirt.

Features and Benefits

- High impact strength; recovers completely if crushed and provides excellent fatigue life.
- Highly UV resistant; suitable for use in outdoor applications.
- Offered in fine or coarse corrugated pitch.
- Offered with or without slit; slit options offer easy access during installation and maintenance.

High Impact HelaGuard is ideal for robotics and industrial automation.

MATERIAL	Polyamide 12 (PA12)
Operating Temperature	-58°F to +230°F (-50°C to +110°C)
Flammability	Self-extinguishing according to EN IEC 61386

Standard Weight Double Slit Nylon Conduit

HG-DC Series, PA6

A Standard Weight Corrugated Conduit with two slit openings that eases installation and maintenance of wire and cable bundles. The interlocking construction is excellent for retrofitting projects. PA6 material is highly resistant to solvents and oils, and offers UV and abrasion resistance.

Features and Benefits

- Double slit opening offers easy access during installation and maintenance.
- Material is easy to use and cut; reduces installation time and labor costs.
- Flexible, abrasion resistant and durable for a variety of applications.
- Good impact strength; recovers quickly if crushed.
- UV resistant; suitable for use in outdoor applications.
- Offered in fine or coarse corrugated pitch.

Double Slit HelaGuard allows for ease in retrofitting.

MATERIAL	Polyamide 6 (PA6)
Operating Temperature	-40°F to +248°F (-40°C to +120°C)
Flammability	Self-extinguishing according to EN IEC 61386

Routing, Protection & Insulation

HelaGuard Nonmetallic Fittings

Straight External NPT Thread Fittings

HG-S & HGL-S Series

Straight Fitting features a snap-on design that provides a quick, secure connection. Constructed of a durable nylon material with a high resistance to salts, oils, weak acids and solvents. Designed for easy removal with a small screwdriver. Choose from IP66 or IP68 ingress protection rated fittings.

Features and Benefits

- External NPT thread provides a secure connection.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- IP66 fitting has one-piece construction.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

90-Degree Elbow External NPT Thread Fittings

HG-90 & HGL-90 Series

Elbow Fitting features a snap-on design that provides a quick, secure connection. Constructed of a durable nylon material with a high resistance to salts, oils, weak acids and solvents. Designed for easy removal with a small screwdriver. Choose from IP66 or IP68 ingress protection rated fittings.

Features and Benefits

- External NPT thread provides a secure connection.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- Elbow features a smooth, swept bore to ease cable installation.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- IP66 fitting has one-piece construction.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

Straight Nylon External Threaded Fittings**HGU-S Ultra® Series**

Straight snap-on style metric or NPT threaded nylon fittings provide a true, one-piece component solution; seals and locknuts are included. Durable nylon materials deliver high chemical resistance against salts, oils, weak acids and solvents. Designed for easy removal with a small screwdriver. UL-Listed fittings deliver IP66 + IP67 + IP68 + IP69 ingress protection.

Features and Benefits

- Integrated Sealing Technology includes conduit insert seal and high-performance, face-sealing washer for ease of use and durability.
- True, one-piece component for fast snap-on application reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to corrugated conduit and deliver a high extraction force.
- PA66 nylon material has high resistance to salts, oils, weak acids and solvents.
- Integrated design delivers IP66 + IP67 + IP68 + IP69 ingress protection against moisture and dirt.

45-Degree Elbow Nylon External Threaded Fittings**HGU-45 Ultra® Series**

Elbow snap-on style metric or NPT threaded nylon fittings provide a true, one-piece component solution; seals and locknuts are included. Durable nylon materials deliver high chemical resistance against salts, oils, weak acids and solvents. Designed for easy removal with a small screwdriver. UL-Listed fittings deliver IP66 + IP67 + IP68 + IP69 ingress protection.

Features and Benefits

- Integrated Sealing Technology includes conduit insert seal and high-performance, face-sealing washer for ease of use and durability.
- True, one-piece component for fast snap-on application reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to corrugated conduit and deliver a high extraction force.
- PA66 nylon material has high resistance to salts, oils, weak acids and solvents.
- Integrated design delivers IP66 + IP67 + IP68 + IP69 ingress protection against moisture and dirt.

Routing, Protection & Insulation

HelaGuard Nonmetallic Fittings

T-Connectors

HG-T & HGL-T Series

T-Connectors are used to join three runs of same-diameter corrugated conduit together and redirect cables and hoses into multiple directions. Constructed of a durable nylon material with a high resistance to salts, oils, weak acids and solvents. Designed for easy removal with a small screwdriver. Choose from IP66 or IP68 ingress protection rated fittings.

Features and Benefits

- Used to join three runs of same-diameter conduit and route in multiple directions.
- Inspection lid facilitates cable pull through and eases installation.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- Vibration and shock tested to EN61373 Category 2.
- IP66 fitting has one-piece construction.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

Y-Divider Fittings

HG-Y and HGL-YL Series Fittings

Y-Divider connectors are used to reduce diameter of conduit runs and redirect in side-by-side direction. Constructed of a durable nylon material with a high resistance to salts, oils, weak acids and solvents. Designed for easy removal with small screwdriver. Choose from IP66 or IP68 ingress protection rated fittings.

Features and Benefits

- Conduit divider fitting used to reduce conduit run diameter sizes.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- IP66 fitting has one-piece construction.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

HelaGuard Nonmetallic Fittings

Conduit Couplers

HG-HG Series

Used to join two runs of same-diameter corrugated conduit together, Conduit Couplers feature a snap-on design for a quick, secure connection. Designed for easy removal with a small screwdriver. Suitable for use on all types of corrugated conduit, both fine and coarse pitch material.

Features and Benefits

- One-piece fitting used to join two runs of same-diameter conduit.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- IP66 ingress protection rating against water, dust and wind.

HelaGuard Nonmetallic Fittings

Conduit Reducers

HG-R & HGL-R Series

Conduit Reducers are used with T-Connectors to combine different conduit diameters. Suitable for use on all types of corrugated conduit, both fine and coarse pitch material. Nylon material provides high resistance to oils and solvents, with great durability and extremely high extraction force. Choose from IP66 or IP68 ingress protection rated fittings.

Features and Benefits

- Used to join conduit of different diameters.
- Snap-on construction reduces installation time and costs by eliminating the need to thread fittings onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- Vibration and shock tested to EN61373 Category 2.
- IP66 fitting has one-piece construction.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

PSR Reinforced Spiral Tubing

PSR Series, PVC

Lightweight tubing with a smooth inside bore, made of a spiral-reinforced PVC material that provides high flexibility. This tubing is well-suited for protecting wire and cable bundles in extremely tight spaces. UV resistant. Use with HelaGuard Nonmetallic Compression Fittings to create an enclosed system.

Features and Benefits

- Spiral-reinforced construction provides protection from crushing yet remains extremely flexible.
- Lightweight, easy-to-use material reduces installation time and labor costs.
- Material stands up to vibration and limited torsional movement without creation of stress points or cracks.
- Smooth inside bore protects wires and eases insertion of wire bundles.
- UV resistant; suitable for use in outdoor applications.

PSR Reinforced Spiral Tubing

Routing, Protection & Insulation

HelaGuard Nonmetallic Reinforced Smooth Tubing

LPC Reinforced Smooth Tubing

LPC Series, PVC

Lightweight, smooth tubing made of a spiral-reinforced PVC material that provides high flexibility; well-suited for protecting wire and cable bundles in extremely tight spaces. UV resistant. Use with HelaGuard Metallic (LPC-C) or Nonmetallic Compression (PSR) Fittings for IP68 rating.

Features and Benefits

- Spiral-reinforced construction provides protection from crushing, yet remains extremely flexible.
- Lightweight, easy-to-use material reduces installation time and labor costs.
- Material stands up to vibration and limited torsional movement without creation of stress points or cracks.
- Smooth inside bore protects wires and eases insertion of wire bundles.
- UV resistant; suitable for use in outdoor applications.
- Outer surface wipes clean in wash-down environments.

2-Piece NPT Thread Compression Fittings

PSR-S, PSR-90 & PSR-45 Series

Compression Fittings feature a twist-on design for easy installation and future access. Constructed of a durable nylon material with a high resistance to salts, oils, weak acids and solvents. Fits HelaGuard Nonmetallic LPC and PSR Tubing.

Features and Benefits

- External NPT thread provides a secure connection.
- Twist-on installation makes future access fast and easy.
- Internal spigot design helps ease threading of fitting onto conduit.
- All-around "teeth" attach firmly to conduit and deliver a high extraction force.
- Durable nylon material has high resistance to salts, oils, weak acids and solvents.
- IP65 rating for protection against wind, dirt and low pressure jets of water from all directions.

Fittings for LPC Smooth Bore PVC Tubing

LPC-C Fixed Straight Compression Fitting, NPT Thread, IP68

Multi-part metallic straight compression style fitting for use with LPC Nonmetallic PVC Tubing. Suitable for NPT threaded entries or knockouts as fitting rotates until tightened. A longer and shallower scroll allows quick assembly and more durable fit with smooth bore tubing. Provides IP68 and up to IP69 ingress protection.

Features and Benefits

- External nickel-plated brass NPT thread provides a durable connection.
- Swivel feature allows fitting to rotate until tightened.
- Metal ferrule insert has shallow and longer scroll for stronger fit with LPC Smooth Bore PVC Tubing.
- IP68 fitting has additional conduit seal for increased protection against wind, dirt and water.

IP68

HelaGuard Accessories

Nylon End Caps for Corrugated Conduit

PAEC Series

Nylon cap snaps over unterminated conduit ends to prevent damage to wires caused by rubbing against sharp conduit edges. For use with HelaGuard Corrugated Conduit.

Features and Benefits

- Snaps over end of conduit when not terminated with fitting to provide smooth entry point and prevent damage to cables.
- Easily to install; reduces installation time.

PAEC Nylon End Cap

PART NO.	Nominal Size (\varnothing)		Type	Bore Hole (OD)	Color	Pkg Qty (pk)

Use Part No. for ordering and Type for specification purposes.

Rubber End Caps

REC Series

Rubber Cap easily slides over unterminated conduit and tubing ends to protect inside wire and cable bundles from debris. For use with HelaGuard Conduit and Tubing.

Features and Benefits

- Flexible rubber material easily slips over end of conduit to seal out dust and debris.
- Diameter markings make it easy to cut down to appropriate size.
- Contains a cable tie slot for extra retention when required.

REC Rubber End Cap

Flammability	UL 94 V-2

Nickel-plated Brass Locknuts

ALNPB Series, Metric or NPT Thread

Locknuts work with threaded fittings or knockout entries.

Features and Benefits

- Nickel-plated brass thread ensures secure connection with brass plated or nylon threaded fittings.
- NPT thread pattern works with metallic or nonmetallic threaded fittings.
- Use NPT metallic locknuts with 1.25", 1.5" and 2" nylon fittings.

ALNPB Nickel-plated Brass Locknut

Nylon Locknuts

ALPA Series, NPT Thread

Made of strong and chemical-resistant PA66 material, locknut secures nonmetallic NPT fittings when used with nonthreaded entries.

Features and Benefits

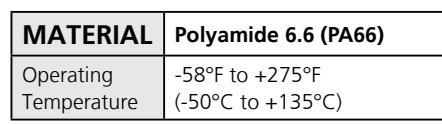

- Ensures fast and secure assembly with nonmetallic NPT fittings.

ALPA Nylon Locknut

PART NO.	Type	Thread Size	Wrenching Flats		Color	Package Quantity

Use Part No. for ordering and Type for specification purposes.

ALPA Polyamide 6.6 (PA66) Locknut

MATERIAL	Polyamide 6.6 (PA66)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Routing, Protection & Insulation

HelaGuard Accessories

Clips for Corrugated Conduit

PACC Series

Conduit Clips clamp onto corrugated conduit to secure. Nylon material resists corrosion and chemicals. Can also be used on C-shaped DIN rails.

Features and Benefits

- Integrated flip-open lid for quick and easy assembly.
- Inner rib prevents conduit from slipping.
- Easy-access mounting hole reduces installation time.
- Quick release for easy future access.

PART NO.	Nominal Size (Ø)	Type	Color	Package Quantity
	in. (mm)			(pk)

166-90183	1-1/2 (54.0)	PACC1500	Black	5

Use Part No. for ordering and Type for specification purposes.

PACC Conduit Clip for Corrugated Conduit

MATERIAL	Polyamide 6.6 (PA66)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)
Flammability	UL 94 V-2

Clips for PSR & LPC Tubing

AFCP Series

Tubing Clips clamp onto conduit and tubing to secure. Nylon material resists corrosion and chemicals. Can also be used on C-shaped DIN rails.

Features and Benefits

- Integrated flip-open lid for quick and easy assembly.
- Smooth inner surface prevents tubing from slipping.
- Easy-access mounting hole reduces installation time.
- Quick release for easy future access.

AFCP Tubing Clip for Flexible PVC Tubing

166-90377	1 (32)	AFCP1000	Black	10

Use Part No. for ordering and Type for specification purposes.

MATERIAL	Polyamide 6.6 (PA66)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)
Flammability	UL 94 V-2

ConCutter Nonmetallic Conduit Cutters

Handheld cutter tool for HelaGuard Nonmetallic Conduit and Tubing.

Features and Benefits

- Assists with installation by easily cutting through HelaGuard Nonmetallic Conduit and Tubing.

PART NO.	Type	Description	Package Quantity
			(pk)
166-51101	CONCUTTER1	For nonmetallic conduit up to 34mm	1
166-51102	CONCUTTER2	For nonmetallic conduit up to 67mm	1

Use Part No. for ordering and Type for specification purposes.

ConCutter Conduit Cutter

Sealing Washers

SW Series for use with Nonmetallic threaded fittings

Chloroprene rubber Sealing Washer for use with Nonmetallic Threaded Fittings.

Features and Benefits

- Protects against water and dust.
- 80 Shore A compression strength.
- For NPT threads.
- Resistant to oil.

MATERIAL	Chloroprene (CR)
Operating Temperature	-40°F to +275°F (-40°C to +135°C)

Routing, Protection & Insulation

HelaGuard Accessories

Sealing Washers

FW Series for use with Metallic Threaded Fittings

Vulcanized fiber Sealing Washer used with Metallic Threaded Fittings. Suitable for metric or NPT threaded fittings.

Features and Benefits

- Rugged, tough material (78 Shore D Hardness) for tighter seal.
- Protects against water and dust.
- For metric or NPT threads.
- Resistant to oil.

MATERIAL	Vulcanized Fibre (VF)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Sealing Washers

RSW Series for use with Nonmetallic and Metallic Fittings

Face Sealing Washer affixed between threaded fitting and entry wall surface to achieve IP66, IP67, IP68 and IP69 levels of ingress protection. Hardness 33 Shore D. Self-extinguishing and halogen-free.

Features and Benefits

- Polyester elastomer washer provides ingress protection against moisture and is oil resistant.
- Small "pips" in bore retain washer onto metric threaded fittings.
- Ribs on both sides of washer enhances sealing performance.

MATERIAL	Polyester Elastomer (TPE)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Cutting Conduit		
Nonmetallic		<p>ConCutter Conduit Cutters can be used to cut HelaGuard Nonmetallic Conduit up to 2" (67mm).</p> <p>To use: Drop the blade into a corrugation and squeeze and twist until conduit is cut 50 percent through. To achieve a clean edge, finish cutting the remaining 50 percent without twisting.</p> <p>See page 35 for tool size options.</p>
Nonmetallic Fittings		
		<p>Snap-On Fittings are quick to assemble, once conduit has been cut to length.</p>
HG		<p>For HG Fittings, simply push the fitting onto the end of the conduit with a slight twist until it will go no further. Once in place, pull back slightly to ensure the locking teeth mechanism has engaged with the corrugations.</p> <p>IP66 Rating</p>
HGL		<p>HGL Fittings feature a conduit seal to provide the ultimate IP rating, IP66, IP67, IP68 and IP69.</p> <p>To install: Moisten the seal, then place the seal on the end of the conduit and press firmly until the seal slides inside. Put the fitting onto the conduit end and twist. Once the fitting is in place, pull back slightly to ensure the locking teeth mechanism has engaged with the corrugations.</p> <p>Note: An HG Fitting cannot be uprated to IP68 with the addition of a seal.</p>
HGU		<p>Ultra® Fittings feature a one-piece integrated sealing design for IP68 and IP69 performance. The conduit seal is pre-assembled inside the fitting for fast and easy installation.</p> <p>To install: Simply push the fitting onto the end of the conduit and give a slight twist motion. Once the fitting is in place, pull back slightly to ensure the locking teeth mechanism has engaged with the corrugations.</p>

To remove HG, HGU or HGL Fittings, insert a small screwdriver into the screwdriver slot and move the screwdriver handle toward the "off" position. Remove the screwdriver, then manually twist the cap further toward the "off" position – the fitting can then be released from the conduit. Once removed, the fitting can be reused by twisting the cap so that the screwdriver slot lines up with the "on" position. See page 5 for step-by-step illustrations.

HelaGuard Metallic Systems

HelaGuard Flexible Metallic Conduit & Fittings

The HelaGuard Flexible Metallic series includes galvanized, jacketed and liquid-tight metal core conduit that offer exceptional flexibility, a high degree of mechanical strength and broad range of protection against environmental conditions. Fittings are manufactured to UL 360 Standards and provide high ingress protection ratings, corrosion resistance and electrical continuity.

Flexible Metallic Conduit & Fittings

Extra-flexible, galvanized or stainless steel construction used in tight or constrained spaces. This conduit is a helically wound, non-UL rated metallic conduit used in applications that demand higher levels of movement, vibration and repetitive bending. Also designed for use where extra-flexible conduit is needed in machinery for protecting hydraulic or pneumatic hoses as well as in elevated temperature conditions. Use with FU-M Series Metallic Fittings for IP40 ratings.

Flexible Jacketed Metallic Conduit & Fittings

HelaGuard Jacketed Metallic Conduit has an extra-flexible galvanized steel core with specialized coatings to address a broad range of environmental conditions. Designed for use in conditions that require extended or repetitive motion and protection against corrosion. Nickel-plated brass fittings provide a higher degree of ingress protection up to IP65.

Liquid-Tight Flexible Metallic Conduit & Fittings

Flexible, liquid-tight galvanized steel core conduit with jacketed coatings designed for specific environmental conditions. Intended for applications that require some movement and a high degree of mechanical strength. Fittings are nickel-plated brass, provide IP68 or greater ingress protection and may be suitable for use in hazardous locations as defined by NEC Article 501.

Hazardous Location Materials

Flameproof straight and elbow glands with an inner compound barrier offer high specification, high quality solution for EX d, EX e, and EX ta applications. ATEX and/or IEC approvals for Group I and Group II. For indoor/outdoor use applications in Zone 1, Zone 2, Zone 21 and Zone 22 Hazardous Areas. The EXD series fittings are used with LTP / LTPHC / LTPPU / LTBRDP Series Metallic Conduit.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Flexible Metallic Conduit

Properties

- Galvanized flexible steel construction for high mechanical strength and impact resistance.
- High degree of flexibility and superior fatigue life.
- Stainless steel is highly resistant to rust and corrosion.

Fittings - Use FU-M Series Metallic Fittings.

Applications

- General machine wiring that includes vibration and motion.
- Hose and wiring protection in high temperature conditions (up to +300° C).
- Assemblies with IP40 ingress protection requirements.
- Stainless steel protects sensor cables and instrumentation in corrosive environments (temp range to +400° C).

Flexible Jacketed Metallic Conduit

Properties

- Galvanized flexible steel core construction for high mechanical strength.
- Coatings for specialized environments and applications.
- High degree of flexibility and superior fatigue life.

Fittings - Use FSU Series Metallic Fittings.

Applications

- General machine wiring that includes vibration and motion.
- Assemblies with IP54 or IP65 ingress protection requirements.

Liquid-Tight Flexible Metallic Conduit

Properties

- Galvanized flexible steel core construction for good mechanical strength.
- Smooth-coated surfaces for chemical and environmental resistance that will not crack or tear away.
- High degree of ingress protection.

Fittings - Use LTP Series Metallic Fittings for liquid-tight performance.
- Acceptable for use with EXD Fittings for severe environments.

Applications

- General machine wiring for indoor or outdoor environments.
- Associated fittings deliver IP66, IP67, IP68 and IP69 ingress protection levels.

Flexible Braided Metallic Conduit

Properties

- Galvanized steel core provides flexibility and mechanical strength and impact protection against crushing.
- Overbraided galvanized steel center layer provides EMI / RFI screening.
- Jacketed PVC cover provides liquid-tight performance and high resistance to chemical and environmental conditions.

Fittings - Use LTP Series Metallic Fittings for liquid-tight performance.

Applications

- Flexible conduit where EMC / RFI screening is required.
- Associated LTP fittings deliver IP66, IP67, IP68 and IP69 ingress protection levels.

Straight Compression (C-Style)

Multi-part compression style fitting

Function

- Fitting rotates until body is tightened to collar.
- Adjoins flexible metal conduit to box or conduit body.
- Typically IP66 + IP67 + IP68 + IP69.

Elbow Compression (C90 & C45-Style)

Multi-part compression style fitting 90 or 45 elbows

Function

- Fitting rotates until body is tightened to collar.
- Adjoins flexible metal conduit to box or conduit body.
- Typically IP66 + IP67 + IP68 + IP69.

Straight Swivel Compression (C-S-Style)

Multi-part compression style swivel fitting

Function

- External thread continues to rotate (swivel) about the main body even after tightening.
- Offers a degree of strain relief on conduit with high degree of vibration.
- Typically IP66 + IP67 + IP68 + IP69.

Fixed Thread (M-Style)

Two-part fitting with shell and external thread body

Function

- IP40 or IP54 ingress protection rating.

Couplers (LTP-Style)

Multi-part compression coupler fitting

Function

- Joins two LTP-style conduit runs.
- IP65 ingress protection rating.

EXD-Style

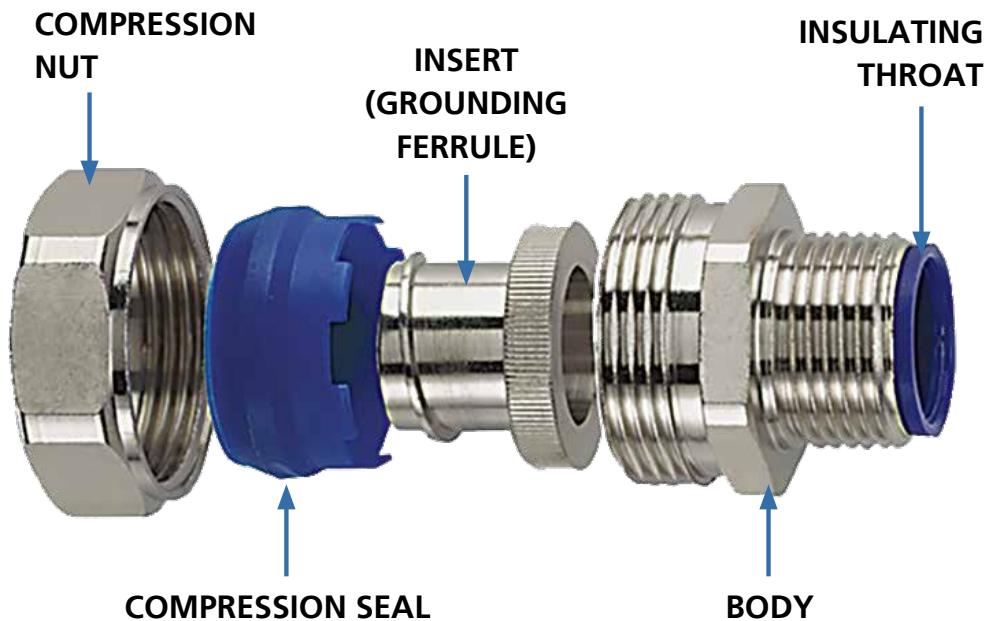

For use in hazardous locations and severe environment applications

Function

- Provide flameproof barrier.
- Available in straight, 90 & 45 degree elbows.
- Provides liquid-tight performance in extreme or severe environments and hazardous locations.
- IP66 + IP67 + IP68 + IP69 ingress protection levels.
- ATEX and IEC approvals.

Liquid-Tight Systems

- Fittings typically manufactured to and interchangeable with liquid-tight conduit made to UL 360 sizes.
- The body, insert and compression nut are always made of metal.

Key differentiating variables include the method of manufacturing and the material used.

- Can impact the following:
 - ◆ Corrosion Resistance
 - ◆ Mechanical Strength
 - ◆ Electrical Continuity
- Level of ingress protection dependent upon:
 - ◆ Insert
 - ◆ Compression Seal
- Machining of body, insert and nut allows for tighter control on tolerances, which improves ingress protection and ratings.
- Nickel-plated brass maintains high electrical continuity and pull-off strength, and resists scrapes and scratches that could expose base material to corrosion.

HelaGuard Metallic Conduit

Flexible Metallic Conduit

FU-x Galvanized Steel Conduit

An extra flexible, galvanized steel conduit used in tight or constrained spaces. FU-x series is a helically wound, non-UL rated metallic conduit used in applications that demand higher levels of movement, vibration and bending. Designed for use where an extra flexible metallic conduit is needed in machinery for protecting hydraulic or pneumatic hoses or in elevated temperature conditions. Use with FU-M Series Metallic Fittings for IP40 ratings.

Features and Benefits

- Inherently low fire hazard material can withstand extreme temperature conditions.
- Durable spiral metallic conduit provides extra flexibility along with a high degree of compression, tensile and impact strength.
- Provides ingress protection performance to IP40 when used with FU-M Style Fittings.
- Tight bend radius for use in installations requiring constant movement or vibration.

MATERIAL	Galvanized Steel (GS)
Operating Temperature	-148°F to +572°F (-100°C to +300°C)

Flexible Metallic Conduit

SSU Stainless Steel Conduit

Highly flexible stainless steel conduit used in constrained spaces and highly corrosive environments. SSU Conduit is inherently low fire hazard, provides high mechanical strength and is anti-static. Designed for use where an extra flexible stainless steel conduit is needed in machinery, instrumentation and security within harsh environments or extreme temperature conditions. Use with FU-M Series Metallic Fittings for IP40 ingress ratings or FSU-E Conduit End Cap Inserts for a smooth entry point into conduit.

Features and Benefits

- Stainless steel construction is highly resistant to rust and corrosion.
- Inherently low fire hazard material can withstand extreme temperature conditions.
- Durable spiral metallic conduit provides extra flexibility along with a high degree of compression, tensile and impact strength.
- Provides ingress protection performance to IP40 when used with FU-M Style Fittings.
- Tight bend radius for use in installations requiring constant movement or vibration.

HelaGuard Metallic Conduit

Fittings for FU-x Metallic Conduit

FU-M Fixed Thread Straight Compression Fitting, IP40

Two-part nickel-plated brass straight fitting with fixed external metric thread. Fitting comprised of shell and body suitable for knockout entries. For use with FU-x Flexible Metal Conduit.

Features and Benefits

- Nickel-plated brass compression fitting used with FU-x Series Flexible Metallic Conduit.
- Two-part fitting comprised of shell and body with external metric thread delivers IP40 ingress protection.
- Suitable for knockouts and secured with a metric threaded locknut.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +572°F (-50°C to +300°C)

Use Type for ordering and specification purposes.

Suitable for use with FU-x Series Conduit on page 50.

Flexible Metallic Conduit

FSU Galvanized Steel Conduit, PVC Cover

An extra-flexible, galvanized steel conduit with a smooth, oil-resistant PVC coating. FSU series is a spiral constructed, non-UL rated liquid-tight conduit used in applications that demand higher levels of movement, vibration and bending. Designed for use where an extra-flexible metallic conduit is needed as well as protection for wires against impact and exposure to oils and chemicals. Use with HelaGuard FSU Metallic Fittings for IP65 ratings.

Features and Benefits

- Durable spiral metallic conduit provides extra flexibility and delivers a high degree of compression strength and impact resistance.
- Smooth PVC cover resists oil and grease and will not crack under repeated bending.
- Provides ingress protection performance to IP65 when used with FSU-styled Fittings.
- Tight bend radius for use in installations that require constant movement or vibration.

MATERIAL	Galvanized Steel (GS) Polyvinylchloride (PVC)
Operating Temperature	+5°F to +158°F (-15°C to +70°C)

Suitable for use with FSU Series Fittings on pages 56 to 60.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Flexible Metallic Conduit with Jacketed Covers

LFHU Galvanized Steel Conduit, Low Fire Hazard (LFH) Cover

An extra-flexible, galvanized steel conduit with a smooth, oil-resistant and low fire hazard coating. LFHU series is a spiral constructed, non-UL rated metallic conduit used in applications that demand higher levels of movement, bending and impact protection. Designed for applications within enclosed areas where limited smoke, low flame spread and low toxic gas emissions are required. Use with HelaGuard FSU Metallic Fittings for IP65 ratings.

Features and Benefits

- Durable spiral metallic conduit provides extra flexibility and delivers a high degree of compression strength and impact resistance.
- Smooth, low fire hazard cover resists oil and grease and will not crack under repeated bending.
- Provides ingress protection performance to IP65 when used with FSU-styled Fittings.
- Tight bend radius for use in installations requiring constant movement or vibration.
- Halogen-free.

MATERIAL	Galvanized Steel (GS) Polyolefin (PO)
Operating Temperature	-13°F to +194°F (-25°C to +90°C)
Flammability	Self-Extinguishing (EN 613861)

Suitable for use with FSU Series Fittings on pages 56 to 60.

Flexible Metallic Conduit with Jacketed Cover

FPU Galvanized Steel Conduit, Polyurethane (PU) Cover

An extra flexible, galvanized steel conduit with a smooth, oil-resistant and halogen-free polyether + polyurethane coating. FPU series is a spiral constructed, non-UL rated metallic conduit used in applications that demand higher levels of bending and impact protection. Designed for low-temperature applications where mechanical strength and halogen-free materials are required. Use with HelaGuard FSU Metallic Fittings for IP65 performance.

Features and Benefits

- Durable spiral metallic conduit provides extra flexibility and delivers a high degree of compression strength and impact resistance.
- Polyurethane cover provides high abrasion resistance and performance in low-temperature applications.
- Provides ingress protection performance to IP65 when used with FSU-styled Fittings.
- Low fire hazard cover rated UL 94 V-0.
- Halogen-free.

MATERIAL	Galvanized Steel (GS) Polyurethane (PU)
Operating Temperature	-40°F to +212°F (-40°C to +100°C)
Flammability	UL 94 V-0

Suitable for use with FSU Series Fittings on pages 56 to 60.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Fittings for FSU Metallic Conduit with Jacketed Cover

FSU-C Fixed Thread Straight Compression Fitting, IP65

Multipart straight compression fitting with fixed external thread pattern suitable for threaded or knockout entries. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. Fitting comprised of body, nut, grounding ferrule and nylon compression seal. For use with FSU, FPU, and LFHU Flexible Metal Conduit.

Features and Benefits

- Nickel-plated brass compression fitting used with FSU, LFHU and FPU flexible metallic conduit.
- Fitting includes elastomeric sealing washer for IP65 ingress protection.
- Suitable for knockouts or NPT / metric threaded entries as fitting rotates until tightened.

MATERIAL	Nickel-plated Brass (NPB) Polyamide 6 (PA6)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Fittings for FSU Metallic Conduit with Jacketed Cover

FSU-C90 Fixed Thread 90-Degree Elbow Compression Fitting, IP65

Multipart 90 degree elbow compression fitting with fixed external metric thread pattern suitable for threaded or knockout entries. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. Fitting comprised of body, nut, grounding ferrule and nylon compression seal. For use with FSU, FPU, and LFHU Flexible Metal Conduit.

Features and Benefits

- Nickel-plated brass compression fitting used with FSU, LFHU and FPU Flexible Metallic Conduit.
- Fitting includes elastomeric sealing washer for IP65 ingress protection.
- Suitable for knockouts or metric threaded entries.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Fittings for FSU Metallic Conduit with Jacketed Cover

FSU-C-S Swivel Thread Straight Compression Fitting, IP65

Two-part nickel-plated brass straight fitting with swivel external metric thread. Fitting comprised of shell and body suitable for knockout or threaded metric entries. For use with FSU, FPU, and LFHU Flexible Metal Conduit.

Features and Benefits

- Nickel-plated brass compression fitting used with FSU, LFHU and FPU Flexible Metallic Conduit.
- Two-part swivel fitting comprised of shell, body and elastomer seal delivers IP65 ingress protection.
- External thread swivels about main body even after tightening.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Fittings for FSU Metallic Conduit with Jacketed Cover

FSU-M Fixed Thread Straight Compression Fitting, IP54

Two-part nickel-plated brass straight fitting with fixed external metric thread. Fitting comprised of shell and body suitable for knockout entries. For use with FSU, FPU and LFHU Flexible Metal Conduit.

Features and Benefits

- Nickel-plated brass compression fitting used with FSU, LFHU and FPU Flexible Metallic Conduit.
- Two-part fitting comprised of shell and body with external metric thread delivers IP54 ingress protection.
- Suitable for knockouts and secured with a metric threaded locknut.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +572°F (-50°C to +300°C)

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Metallic Conduit End Cap Insert

FSU-E Metallic Conduit End Cap

Nickel-plated brass End Cap Insert creates a smooth bore exit, protecting cables from damage. Twist-in ferrule serves as grounding core for spiral-constructed metallic conduit. Use with FSU, LFHU, FPU, SSU and FU-X Series Metallic Conduit.

Features and Benefits

- Single-part insert creates smooth entry / exit point for wire and cables.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-148°F to +572°F (-100°C to +300°C)

Flexible Metallic Conduit with Liquid-Tight Jacketed Cover

LTP Galvanized Steel Conduit, PVC Cover

Flexible, liquid-tight galvanized steel conduit with a smooth, oil-resistant PVC coating. LTP series is a general purpose, non-UL rated liquid-tight conduit used in applications that require movement, vibration and bending. Use with LTP or LTPUL Series Metallic Fittings for IP66 + IP67 + IP68 + IP69 ratings. Designed for applications where a UL Listing or CSA certification is not required but a need still exists for a flexible metal conduit to protect wires against impact and exposure to oils and chemicals. May be used in hazardous locations when accompanied with LTPUL or EXD Metallic Fittings.

Features and Benefits

- Flexible metallic conduit provides liquid-tight performance to IP66 + IP67 + IP68 + IP69 when used with LTP or LTPUL Series Fittings.
- Helically wound (spiral) galvanized steel core with an interlocking design delivers high degree of compression strength and impact resistance.
- Smooth PVC cover resists oil and grease and will not wrinkle when conduit is bent; also resistant to acids.
- UV-resistant (black), suitable for outdoor use.
- Manufactured to UL 360 requirements.

MATERIAL	Galvanized Steel (GS) Polyvinylchloride (PVC)
Operating Temperature	-4°F to +221°F (-20°C to +105°C)
Flammability	Self-Extinguishing (EN 613861)

Use Type for ordering and specification purposes.

Suitable LTP Series Fittings found on pages 66 to 70, 75 and EXD Style Fittings on pages 77 to 80.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Flexible Metallic Conduit with Liquid-Tight Jacketed Cover

LTP Galvanized Steel Conduit, Low Fire Hazard (LFH) Cover

Flexible, liquid-tight galvanized steel conduit with a smooth, oil-resistant and low fire hazard cover. LTPLFH series is a general purpose, non-UL rated liquid-tight conduit used in applications that require movement, vibration and bending. Designed for applications within enclosed areas where limited smoke, low flame spread and low toxic gas emissions are required. Use with HelaGuard LTP or LTPUL Metallic Compression Fittings for IP66 + IP67 + IP68 + IP69 ratings. May be used in hazardous locations when accompanied with LTPUL or EXD Metallic Fittings.

Features and Benefits

- Flexible metallic conduit provides liquid-tight performance to IP66 + IP67 + IP68 + IP69 when used with LTP or LTPUL Fittings.
- Helically wound (spiral) galvanized steel core with an interlocking design delivers high degree of compression strength and impact resistance.
- Smooth LFH cover resists oil and grease and possesses low fire hazard characteristics.
- UV-resistant (black), suitable for outdoor use.
- Halogen-free.
- Manufactured to UL 360 requirements.

Use Type for ordering and specification purposes.

Suitable LTP Series Fittings found on pages 66 to 70, 75 and EXD Style Fittings on pages 77 to 80.

Flexible Metallic Conduit with Liquid-Tight Jacketed Cover

LTP Galvanized Steel Conduit, Thermoplastic (TPE-V) Cover

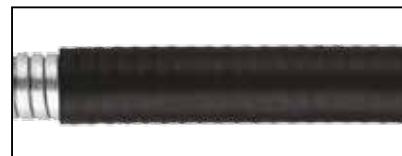

Flexible, liquid-tight galvanized steel conduit with a smooth, halogen-free thermoplastic elastomer coating. LTPHC series is ideal for machinery or outdoor applications where extreme temperatures exist and liquid-tight performance is a requirement. Use with HelaGuard LTP or LTPUL Metallic Fittings for IP66 + IP67 + IP68 + IP69 ratings. May be used in hazardous locations when accompanied with LTPUL or EXD Metallic Fittings.

Features and Benefits

- Flexible metallic conduit provides liquid-tight performance to IP66 + IP67 + IP68 + IP69 when used with LTP or LTPUL Fittings.
- Helically wound (spiral) galvanized steel core with an interlocking design delivers high degree of compression strength and impact resistance.
- Smooth thermoplastic TPE-V rubber protects against corrosion; remains flexible at low and high temperatures.
- UV-resistant (black), suitable for outdoor use.
- Manufactured to UL 360 requirements.
- Halogen-free.

MATERIAL	Galvanized Steel (GS) Thermoplastic Rubber (TPE-V)
Operating Temperature	-76°F to +302°F (-60°C to +150°C)
Flammability	Self-Extinguishing (EN 613861)

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Flexible Metallic Conduit with Liquid-Tight Jacketed Cover

LTP Galvanized Steel Conduit, Polyurethane (PU) Cover

Flexible, liquid-tight galvanized steel conduit with a smooth, oil-resistant polyurethane coating. LTPPU series is a halogen-free conduit designed for low-temperature performance, and has excellent flame retardation, limited smoke and low toxicity properties. Use with LTP or LTPUL Series Metallic Fittings for IP66 + IP67 + IP68 + IP69 ratings. May be used in hazardous locations when accompanied with LTPUL or EXD Metallic Fittings.

Features and Benefits

- Flexible metallic conduit provides liquid-tight performance to IP66 + IP67 + IP68 + IP69 when used with LTP or LTPUL Fittings.
- Helically wound (spiral) galvanized steel core with an interlocking design delivers high degree of compression strength and impact resistance.
- Polyurethane cover resists oil and will not crack or breakdown in low-temperature applications.
- Low fire hazard cover rated UL 94 V-0.
- Manufactured to UL 360 size requirements.
- Halogen-free.

MATERIAL	Galvanized Steel (GS) Polyurethane (PU)
Operating Temperature	-40°F to +212°F (-40°C to +100°C)
Flammability	UL 94 V-0

Flexible Overbraided Metallic Conduit with Liquid-Tight Jacketed Cover

LTP Galvanized Steel Conduit, Overbraided Center and PVC Cover

Flexible, liquid-tight galvanized steel conduit with a smooth, oil-resistant PVC coating and galvanized steel middle braid. LTBRDP Series Conduit is designed for liquid-tight applications where a high degree of corrosion resistance is required along with EMC screening. Use with HelaGuard LTP or LTPUL Series Metallic Fittings for IP66 + IP67 + IP68 + IP69 ratings.

Features and Benefits

- Flexible metallic conduit provides liquid-tight performance to IP66 + IP67 + IP68 + IP69 when used with LTP or LTPUL Fittings.
- Helically wound (spiral) galvanized steel core with an interlocking design delivers high degree of compression strength and impact resistance.
- Smooth PVC cover resists oil and grease and will not wrinkle or crack when conduit is bent; also provides corrosion resistance.
- Center layer of galvanized steel overbraid provides EMC screening 60dB @ 1MHz.
- Manufactured to UL 360 requirements.

MATERIAL	Galvanized Steel (GS) Polyvinylchloride (PVC)
Operating Temperature	-4°F to +221°F (-20°C to +105°C)
Flammability	Self-Extinguishing (EN 613861)

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Fittings for LTP Metallic Conduit with Liquid-Tight Cover

LTP-C Fixed Straight Compression Fitting, IP68

Multipart Straight Compression Fitting with fixed external NPT or metric threads for liquid-tight performance. Metric-threaded fittings supplied with insulated throat, which protects conductors from mechanical damage caused by vibration. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. UL Listed and suitable for hazardous locations as defined by NEC Article 501. Fitting comprised of body, nut, grounding ferrule and nylon compression seal. For use with LTP Series Liquid-Tight Metallic Conduit.

Features and Benefits

- UL Listed to UL 514B standards.
- Multipart compression fitting includes nylon seal for ingress protection ratings to IP66 + IP67 + IP68 + IP69.
- Durable nickel-plated brass material provides high mechanical strength and resistance to oil and corrosion.
- Suitable for knockouts or NPT / metric threaded entries.
- Interchangeable with all LTP Series Liquid-Tight Metallic Conduit made to UL 360 sizes.
- Suitable for use in hazardous locations as per NEC Article 501 (B)(2): Class I, Division 2; Article 502 (A)(2) & (B)(2) Class II, Division 1 and 2; and Article 503 (A)(3) & (B)(3) Class III, Divisions 1 and 2.

MATERIAL	Nickel-plated Brass (NPB) Polyamide 6 (PA6)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Fittings for LTP Metallic Conduit with Liquid-Tight Cover

LTP-C90 Fixed Thread 90-Degree Elbow Compression Fitting, IP68

Multipart 90 Elbow Compression Fitting with fixed external metric threads for liquid-tight performance. Metric-threaded fittings supplied with insulated throat, which protects conductors from mechanical damage caused by vibration. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. Metric thread is UL Listed and suitable for hazardous locations as defined by NEC Article 501. Fitting comprised of body, nut, grounding ferrule and nylon compression seal. For use with LTP Series Liquid-Tight Metallic Conduit.

Features and Benefits

- UL Listed to UL 514B standards.
- Multipart compression fitting includes nylon seal for ingress protection ratings to IP66 + IP67 + IP68 + IP69.
- Durable nickel-plated brass material provides high mechanical strength and resistance to oil and corrosion.
- Suitable for knockouts or metric threaded entries.
- Interchangeable with all LTP Series Liquid-Tight Metallic Conduit made to UL 360 sizes.
- Suitable for use in hazardous locations as per NEC Article 501 (B)(2): Class I, Division 2; Article 502 (A)(2) & (B)(2) Class II, Division 1 and 2; and Article 503 (A)(3) & (B)(3) Class III, Divisions 1 and 2.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Fittings for LTP Metallic Conduit with Liquid-tight Cover

LTP-C45 Fixed Thread 45-Degree Elbow Compression Fitting, IP68

Multipart 45 Elbow Compression Fitting with fixed external metric threads for liquid-tight performance. Metric threaded fittings supplied with insulated throat, which protects conductors from mechanical damage caused by vibration. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. Metric thread is UL Listed and suitable for hazardous locations as defined by NEC Article 501. Fitting comprised of body, nut, grounding ferrule and nylon compression seal. For use with LTP Series Liquid-Tight Metallic Conduit.

Features and Benefits

- UL Listed to UL 514B standards.
- Multipart compression fitting includes nylon seal for ingress protection ratings to IP66 + IP67 + IP68 + IP69.
- Durable nickel-plated brass material provides high mechanical strength and resistance to oil and corrosion.
- Suitable for knockouts or metric threaded entries.
- Interchangeable with all LTP Series Liquid-Tight Metallic Conduit made to UL 360 sizes.
- Suitable for use in hazardous locations as per NEC Article 501 (B)(2): Class I, Division 2; Article 502 (A)(2) & (B)(2) Class II, Division 1 and 2; and Article 503 (A)(3) & (B)(3) Class III, Divisions 1 and 2.

MATERIAL	Nickel-plated Brass (NPB) Polyamide 6 (PA6)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

166-90431	LTP63-M63-CUL45	2	(63.0)	1.93	(49.0)	Metal	1

Use Type for ordering and specification purposes.

Suitable for use with LTP, LTPLFH, LTPHC, LTTPU, and LTBRDP Conduit on pages 61 to 65.

Fittings for LTP Metallic Conduit with Liquid-Tight Cover

LTP-C-S Swivel Thread Straight Compression Fitting, IP68

Multipart Straight Compression Fitting with swivel external metric threads for liquid-tight performance. Constructed with nickel-plated brass components that resist corrosion and ensure high mechanical strength and electrical continuity. Fitting comprised of body, swivel thread, nut, grounding ferrule and nylon compression seal. For use with LTP Series Liquid-Tight Metallic Conduit.

Features and Benefits

- Multipart compression fitting includes nylon seal for ingress protection ratings to IP66 + IP67 + IP68 + IP69.
- Swivel feature allows conduit system to be fully assembled, complete with wiring, while still allowing the fitting to be screwed into a metric threaded entry box without having to rotate the conduit.
- Insulated throat protects conductors from mechanical damage caused by vibration.
- Durable nickel-plated brass material provides high mechanical strength and resistance to oil and corrosion.
- Interchangeable with all LTP Series Liquid-Tight Metallic Conduit made to UL 360 sizes.

MATERIAL	Nickel-plated Brass (NPB) Polyamide 6 (PA6)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

166-90414	LTP32-M32-S	1	(32.0)	0.97	(24.6)	Metal	2

Use Type for ordering and specification purposes.

Suitable for use with LTP, LTPLFH, LTPHC, LTPPU, and LTBRDP Conduit on pages 61 to 65.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Fittings for LTP Metallic Conduit with Liquid-Tight Cover

LTP-LTP Straight Compression Coupler Fitting, IP68

Multi-part nickel-plated brass compression coupler for joining two runs of liquid-tight metallic conduit. Coupler consists of a threaded body, two wrenching nuts, grounding ferrule and nylon compression seal.

Features and Benefits

- Low-profile design eases access and installation in tight-fit applications.
- Multipart compression fitting includes polyamide seal for sealing out moisture to obtain IP66, IP67, IP68 and IP69 ingress protection levels.
- Durable nickel-plated brass material provides high mechanical and tensile strength and resistance to oil and corrosion.
- Interchangeable with all liquid-tight metallic conduit made to UL 360 sizes.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

PART NO.	Type	Nominal Size (Ø)		Clearance Hole (Ø)		Color	Package Quantity (pk)
		in.	(mm)	in.	(mm)

Use Type for ordering and specification purposes.

Suitable for use with LTP, LTPLFH, LTPHC, LTTPU, and LTBRDP Conduit on pages 61 to 65.

Nickel-plated Brass Locknuts**ALNPB Series, Metric or NPT Thread**

Locknuts work with threaded fittings or knockout entries.

Features and Benefits

- Nickel-plated brass thread ensures secure connection with brass-plated or nylon threaded fittings.
- NPT thread pattern works with metallic or nonmetallic threaded fittings.
- Use NPT metallic locknuts with 1.25", 1.5" and 2" nylon fittings.

ALNPB Nickel-plated Brass Locknut

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Sealing Washers

Sw Series for Use with Nonmetallic Threaded Fittings

Chloroprene rubber Sealing Washer for use with nonmetallic threaded fittings.

Features and Benefits

- Protects against water and dust.
- 80 Shore A compression strength.
- For NPT threads.
- Resistant to oil.

MATERIAL	Chloroprene (CR)
Operating Temperature	-40°F to +275°F (-40°C to +135°C)

Sealing Washers

Fw Series for Use with Metallic Threaded Fittings

Vulcanized fiber Sealing Washer used with metallic threaded fittings. Suitable for metric or NPT threaded fittings.

Features and Benefits

- Rugged, tough material (78 Shore D Hardness) for tighter seal.
- Protects against water and dust.
- For metric or NPT threads.
- Resistant to oil.

MATERIAL	Vulcanized Fibre (VF)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

Use Part No. for ordering and Type for specification purposes.

Sealing Washers

Rsw Series for Use with Nonmetallic And Metallic Fittings

Face Sealing Washer affixed between threaded fitting and entry wall surface to achieve IP66, IP67, IP68 and IP69 levels of ingress protection. Hardness 33 Shore D. Self-extinguishing and halogen-free.

Features and Benefits

- Polyester elastomer washer provides ingress protection against moisture and is oil-resistant
- Small "pips" in bore retain washer onto metric-threaded fittings.
- Ribs on both sides of washer enhance sealing performance.

MATERIAL	Polyester Elastomer (TPE)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

PART NO.	Thread Size		Outside Ø (OD)		Inside Ø (ID)		Type	Thickness		Color	Pkg Qty (pk)

Use Part No. for ordering and Type for specification purposes.

Routing, Protection & Insulation

HelaGuard Metallic Conduit

Thread Converters

CNV Series Converts Metric Threads to NPT Thread

Nickel-plated brass thread converter. Metric internal threads and NPT external threads.

Features and Benefits

- Quickly converts metallic metric threads to NPT threaded fittings for use with NPT threaded entries.
- Achieve IP68 level ingress protection with use of Sealing Washer.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +572°F (-50°C to +300°C)

PART NO.	Type	External Thread Size	Internal Thread Size	Color	Pkg Qty
		NPT	Metric		(pk)

Use Type for ordering and specification purposes.

Metallic Conduit End Cap Insert**LTP-E Metallic Conduit End Cap**

Nickel-plated brass End Cap Insert creates a smooth bore exit, ensuring cables do not get damaged. Twist-in ferrule serves as grounding core for liquid-tight metallic conduit.

Features and Benefits

- Single-part insert creates smooth entry / exit point for wire and cables.

MATERIAL	Nickel-plated Brass (NPB)
Operating Temperature	-58°F to +275°F (-50°C to +135°C)

EXD Conduit Fittings

LTP-EXD Flameproof Straight Compression Fittings, IP68

Flameproof straight gland with inner compound barrier offers high-specification, high-quality solution for EX d, EX e, and EX ta applications. ATEX and/or IEC approvals for Group I and Group II. For indoor or outdoor use applications in Zone 1, Zone 2, Zone 21 and Zone 22 hazardous areas*. Nickel-plated brass compression style fitting suitable for knockouts and NPT or metric threaded entries for IP66 + IP67 + IP68 + IP69 ingress ratings. Use with LTP / LTPHC / LTPPU / LTBRDP / LTBRDLFH / and LTPLFH Metallic Conduit.

Features and Benefits

- Group I and II approvals
- Multipart straight compression fitting includes elastomer seal and two-part epoxy resin pack for flameproof barrier and ingress protection ratings to IP66 + IP67 + IP68 + IP69.
- Suitable for use in Zone 1, Zone 2, Zone 21 and Zone 22 hazardous areas*.
- Durable nickel-plated brass material provides high mechanical strength, ensures electrical continuity and corrosion resistance.
- Suitable for knockouts or NPT/metric-threaded entries as fitting rotates until tightened.
- ATEX and IECEEx EX d (Flameproof).
- ATEX and IECEEx EX e (Increased Safety).
- ATEX and IECEEx EX ta (Dust Ignition Protection).

HelaGuard Metallic Conduit

EXD Conduit Fittings

LTP-EXD Flameproof 90-Degree Elbow Compression Fittings, IP68

Flameproof 90 elbow gland with inner compound barrier offers high-specification, high-quality solution for EX d, EX e, and EX ta applications. ATEX and/or IEC approvals for Group II. For indoor or outdoor use applications in Zone 1, Zone 2, Zone 21 and Zone 22 hazardous areas. Nickel-plated brass compression style fitting suitable for knockouts and NPT or metric threaded entries for IP66 + IP67 + IP68 ingress ratings. Use with LTP / LTPHC / LTPPU / LTBRDP / LTBRDLFH / and LTPLFH Metallic Conduit.

Features and Benefits

- Group II approvals.
- Multipart 90 Elbow Compression Fitting includes elastomer seal and two-part epoxy resin pack for flameproof barrier and ingress protection ratings to IP66 + IP67 + IP68.
- Suitable for use in Zone 1, Zone 2, Zone 21 and Zone 22 hazardous areas*.
- Durable nickel-plated brass material provides high mechanical strength, ensures electrical continuity and corrosion resistance.
- Suitable for knockouts or metric-threaded entries as fitting rotates until tightened.
- ATEX and IECEx EX d (Flameproof).
- ATEX and IECEx EX e (Increased Safety).
- ATEX and IECEx EX ta (Dust Ignition Protection).

EXD Thread Converters

EXD Series Converts Thread Style and Sizes for Hazardous Locations

Nickel-plated brass thread converters used to increase, reduce or convert thread types in hazardous environments. For use with Flexicon's LTP-EXD Fittings. Achieves IP68 level ingress protection with use of Sealing Washer.

Features and Benefits

- Quickly converts thread size or style for use in threaded entries.
- Obtain IP68 level ingress protection with use of Sealing Washer.
- Suitable for use in Zone 1, Zone 2, Zone 21 and Zone 22 hazardous areas.
- ATEX and IECEx EX d (Flameproof).
- ATEX and IECEx EX e (Increased Safety).
- ATEX and IECEx EX t (Dust Ignition Protection).

Zinc Chloride	++	o	++	++	+	o	o	++	+	o

KEY:

++ = Good resistance
+ = Limited resistance
o = Poor resistance

This information applies at 23°C.

These details provide rough guidelines. They should be regarded as material specifications and are no substitute for suitability tests.

Cutting and Assembly Guide

Cutting Conduit

		
<p>CONCUTTER Conduit Cutters can be used to cut nonmetallic conduit up to 2" diameter.</p> <p>To Use: Drop the blade into a corrugation and squeeze and twist until conduit is cut 50 percent through. To achieve a clean edge, finish cutting the remaining 50 percent without twisting.</p>	<p>Metallic conduit should be cut with a fine-tooth hacksaw or bandsaw. Ensure you make a straight, vertical cut.</p>	<p>Cutting of overbraided conduit is made much easier by tightly wrapping self adhesive tape around the conduit and sawing through the middle of the tape. Remove tape after cutting. Ensure you make a straight, vertical cut.</p>

Assembling Metallic Fittings

		
<p>Metallic fittings are supplied partly assembled. C-type fittings consist of a compression nut, an elastomeric seal, an insert and a body.</p>	<p>First, place the back nut on the conduit followed by the seal (note the orientation). Next, screw the insert into the end of the conduit until this gives a secure fit.</p>	<p>Bring the body to mate with the back nut. Metal fittings should be tightened with a grip style tool to ensure security and IP rating.</p>

Assembling Braided Fittings

  	 
<p>C-type compression fittings consist of an outer compression nut, an inner compression nut, an elastomeric seal, an insert and a body. First, place the outer compression nut on the conduit per image 1 above. Remove the tape used during cutting to secure the braid and pull back to allow the inner compression nut to be fitted per image 2. Next, fit the elastomeric seal (note the orientation) and screw the insert into the end of the conduit until this gives a secure fit per image 3.</p>	<p>Bring the body to mate with the inner compression nut and secure. Next, bring the back shell to mate with the inner compression nut to secure the braid per image 4. Metal fittings should be tightened with a gripping style tool to ensure securing and IP rating per image 5 above.</p>

Appendix

Technical Information — Enclosure Rating by Type

NEMA, UL and CSA Standards

Enclosure Rating	NEMA National Electrical Manufacturers Association (NEMA 250)	UL Underwriters Laboratories, Inc. (UL 50) 	CSA Canadian Standards Association (C22.2 No.94-M91) 
Type 1	Enclosures are intended for indoor use primarily to provide a degree of protection against contact with the enclosed equipment.	Indoor use primarily to provide protection against contact with the enclosed equipment and against a limited amount of falling dirt.	General purpose enclosure. Protects against accidental contact with live parts.
Type 2	Enclosures are intended for indoor use primarily to provide a degree of protection against limited amounts of falling water and dirt.	Indoor use to provide a degree of protection against contact with the enclosed equipment and against a limited amount of falling dirt.	Indoor use to provide a degree of protection against dripping and light splashing of noncorrosive liquids and falling dirt.
Type 3	Enclosures are intended for outdoor use primarily to provide a degree of protection against rain, sleet, windblown dust and damage from external ice formation.	Outdoor use to provide a degree of protection against windblown dust and windblown rain; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use to provide a degree of protection against rain, snow, and windblown dust; undamaged by the external formation of ice on the enclosure.
Type 3R	Enclosures are intended for outdoor use primarily to provide a degree of protection against rain, sleet and damage from external ice formation.	Outdoor use to provide a degree of protection against falling rain; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use to provide a degree of protection against rain, snow; undamaged by the external formation of ice on the enclosure.
Type 4	Enclosures are intended for outdoor use primarily to provide a degree of protection against windblown dust and rain, splashing water, hose-directed water, and damage from external ice formation.	Indoor or outdoor use to provide a degree of protection against falling rain, splashing water, and hose-directed water; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use to provide a degree of protection against rain, snow and windblown dust; splashing and hose-directed water; undamaged by the external formation of ice on the enclosure.
Type 4X	Enclosures are intended for outdoor use primarily to provide a degree of protection against corrosion, windblown dust and rain, splashing water, hose-directed water, and damage from external ice formation.	Indoor or outdoor use to provide a degree of protection against falling rain, splashing water, and hose-directed water; undamaged by the formation of ice on the enclosure; resists corrosion.	Indoor or outdoor use to provide a degree of protection against rain, snow and windblown dust; splashing and hose-directed water; undamaged by the external formation of ice on the enclosure; resists corrosion.
Type 6	Enclosures are intended for outdoor use primarily to provide a degree of protection against hose-directed water, the entry of water during occasional temporary submersion at a limited depth, and damage from external ice formation.	Indoor or outdoor use to provide a degree of protection against entry of water during temporary submersion at a limited depth; undamaged by the formation of ice on the enclosure.	Indoor or outdoor use to provide a degree of protection against entry of water during temporary submersion at a limited depth; undamaged by the formation of ice on the enclosure.
Type 12	Enclosures are intended for indoor use primarily to provide a degree of protection against circulating dust, falling dirt, and dripping noncorrosive liquids.	Indoor use to provide a degree of protection against dust, dirt, fiber flyings, dripping water, and external condensation of noncorrosive liquids.	Indoor use primarily to provide a degree of protection against circulating dust, lint, fibers and flyings; dripping and light splashing of noncorrosive liquids; not provided with knockouts.
Type 13	Enclosures are intended for indoor use primarily to provide a degree of protection against dust, spraying water, oil and noncorrosive liquids.	Indoor use to provide a degree of protection against lint, dust seepage, external condensation and spraying of water, oil and noncorrosive liquids.	Indoor use primarily to provide a degree of protection against circulating dust, lint, fibers and flyings; seepage and spraying of noncorrosive liquids including oils and coolants.

Information for Comparisons of IEC and CSA/NEMA/UL/cUL Ratings

NEMA 250 and UL 50 specify tests for environmental conditions such as falling dirt, ice, corrosion, oil and coolants, whereas IEC 529 (EN60529) does not have such requirements. Different rating requirements make comparisons difficult and are subject to interpretation.

The IEC designation consists of the letters IP followed by two numerals. The first number indicates the degree of protection provided by the enclosure against solid foreign objects entering the enclosure. The second number indicates the degree of protection provided by the enclosure against moisture and ingress of water.

An exact equivalence between NEMA designations and the IEC is not possible. The information provided below is to be considered informational only, and caution is necessary when attempting to cross the two ratings. When using this table, converting a NEMA designation to the IEC is feasible. However, it is not possible to make this conversion inversely. This table conversion is not approved by any standards organization.

NEMA Enclosure Type	IEC Enclosure Type
1	IP10
2	IP11
3	IP54
3R	IP14
4	IP54
4X	IP66
6	IP67
12	IP52
13	IP54

Appendix

Definition of the degrees of protection according to EN 60529 - Ingress Protection

These levels of protection are indicated by a code made up of two constant letters, "IP", and two characteristic numbers that indicate the degree of protection, e.g. IP54. The IP rating indicates the degree of protection against contact/access, and the ingress of solid and liquid foreign bodies.

Contact and Ingress of Solids			Ingress of Liquids		
First characteristic numeral	Designation	Scope of protection	Second characteristic numeral	Designation	Scope of protection
0	Non-protected	No special protection for persons against direct contact with live or moving parts. No protection of the equipment against ingress of solid foreign objects.	0	Non-protected	No special protection.
1	Protection against large foreign bodies	Protection against accidental contact of large areas with live and internal moving parts, e.g. back of hand, but no protection against deliberate access to the parts. Protection against ingress of solid foreign objects with a diameter greater than 50 mm.	1	Protection against vertically dripping water	Water dripping vertically must cause no damage.
2	Protection against medium-sized foreign bodies	Protection against contact between the finger and live or internal moving parts. Protection against ingress of solid foreign objects with a diameter greater than 12.5 mm.	2	Protection against dripping water (tilted)	Water dripping at an angle of 15° to the vertical from any direction must cause no damage.
3	Protection against small foreign bodies	Protection against contact between live or internal moving parts and tools, wires and the like with a thickness greater than 2.5 mm. Protection against ingress of solid foreign objects with a diameter greater than 2.5 mm.	3	Protection against spraying water	Water dripping at an angle of 60° to the vertical from any direction must cause no damage.
4	Protection against granular foreign objects	Protection against contact between live or internal moving parts and tools, wires and the like with a thickness greater than 1 mm. Protection against ingress of solid foreign objects with a diameter greater than 1 mm.	4	Protection against splashing water	Water that splashes against the equipment from any direction must cause no damage.
5	Protection against dust deposits	Complete protection against contact with live or internal moving parts; protection against hazardous dust deposits. The ingress of dust is not completely prevented, but dust may not penetrate in such quantities as to impair the function.	5	Protection against water jets	A water jet from a nozzle that is directed against the equipment from any direction must cause no damage.
6	Protection against dust entry	Complete protection against contact with live or internal moving parts. Protection against the ingress of dust.	6	Protection against flooding	Water must not penetrate the equipment in hazardous quantities in cases of temporary flooding, e.g. due to heavy seas.
			7	Protection during temporary immersion	Water must not penetrate the equipment in hazardous quantities if the equipment is immersed in water under the specified conditions of pressure and time (1m for 30 min.).
			8	Protection during continuous immersion	Water must not penetrate the equipment in hazardous quantities if the equipment is immersed in water (at least 2 bar for 2 h).
			9	Protection against high pressure/steam jet cleaning	Highly pressurized water directed at the enclosure from any direction must cause no damage.

Example:

Code IP65 First digit: Protection against contact and ingress of solid foreign objects.
 Second digit: Protection against ingress of liquids.

Thread Data

Metric Thread Standard thread conforming to EN 60423
