

TabTags®

Easier to peel  
for faster  
installations.

MADE FOR REAL®

## TabTags Instructions:

1. To peel off label, bend liner to expose tab.

2. Press just the tab onto the wire and align label as needed.

3. Wrap label and clear tail around wire to laminate the printed portion.

4. Finished application.

# Identification

## Labels

### Thermal Transfer Labels

#### TabTags® Self-Laminating Labels

HellermannTyton TabTag thermal transfer self-laminating labels are a conformable vinyl film with a white printable surface followed by a clear tail that laminates the printed text when applied to a wire or cable. Handling the label by the tab helps keep fingers off the clear overlay, ensuring years of performance. The labels are UL recognized for indoor use with an aggressive acrylic adhesive that enables the label to bond to large and small diameter wires.

#### Features and Benefits

- Convenient tab is easier to remove from the liner, speeding labeling operations.
- Tab acts as a guide during positioning or repositioning to ensure a straight wrap and a high-quality appearance.
- Tab helps prevent label slippage when applied to cable insulation, reducing labor.
- In tests, TabTags increased the average number of wraps per hour by 12 percent, saving time and increasing output.
