

Surge-Trap[®] Pluggable STP-50 Series

Surge Protective Device

SURGE PROTECTION

DIN-RAIL MOUNT PLUGGABLE FOR ANSI/UL 1449 TYPE 1 AND 2 APPLICATIONS

Surge-Trap Pluggable STP-50 Series Surge Protective Device (SPD) is a no-fuse, fail-safe surge suppressor featuring Mersen's TPMOV[®] technology inside – no need for additional overcurrent protection. DIN-rail mountable featuring a fail-safe self-protected design, visual indicator, and a small footprint. A remote indicator provides status to critical control circuitry. High short circuit rating makes it suitable for most industrial control panels.

The diagram shows a two-pole RCCB. It has two input terminals at the top labeled L1 and L2. Each terminal is connected to a vertical line representing the pole. These poles pass through a central core (the magnetic yoke) and then through a sensing coil (indicated by dashed lines). After the sensing coil, the poles are connected to two output terminals. Both output terminals are connected to a common ground line labeled G/N, which is connected to a ground symbol.
