To be competitive in today's digital era, machine builders must be innovative. Smart machines, those that are better connected, more flexible, more efficient, and safe, are enabling machine builders to innovate in ways never before possible.

EcoStruxure, Schneider Electric's open, IoT-enabled architecture and platform, offers powerful solutions for the digital era. As part of this, EcoStruxure Machine brings powerful opportunities for machine builders and OEMs, empowering them to offer smart machines and compete in the new, digital era.

EcoStruxure Machine brings together key technologies for product connectivity and edge control on premises, and cloud technologies to provide analytics and digital services.

EcoStruxure Machine helps you bring more innovation and added value to your customers throughout the entire machine life cycle.

Innovation at Every Level for Machines is full systems across three layers:

- Connected products
Our connected products for measuring, actuating, device level monitoring, and control adhere to open standards to provide unmatched integration opportunities and flexibility
- Edge Control
We are IIoT-ready with a proven set of tested and validated reference architectures that enable the design of end-to-end open, connected, and interoperable systems based on industry standards. Ethernet and OPC UA facilitates IT/OT convergence meaning machine builders reap benefits from web interfaces and cloud.
- Apps, Analytics & Services
Seamless integration of machines to the IT layer allows the collection and aggregation of data ready for analysis – for machine builders and end users alike this means increased uptime and the ability to find information faster for more efficient operations and maintenance.

These levels are completely integrated from shop floor to top floor. And we have cloud offers and end-to-end cybersecurity wrapped around.

EcoStruxure Machine makes it easier for OEMs/machine builders to offer their customers smarter machines. The advent of smart machines is driven by the changing needs of end users:

- Evolving workforce
- Reducing costs
- Dynamic markets
- Shorter life cycles
- Prioritizing functional safety and cybersecurity

EcoStruxure Machine provides one solution for the whole machine life cycle:

- With Smart Design & Engineering the time to market is reduced by up to 30% using our automated engineering and the simulation capabilities
- During Commissioning & Operation of the machine, resources such as energy, material and loss can be improved, and with seamless integration to the IT world efficiency can be improved by up to 40%
- Smart Maintenance & Services reduces the time for corrective actions up to 50%

EcoStruxure™ Machine

Lexium MC12 multi carrier

The multi carrier transport system

Specifications

Specifications of Lexium MC12 multi carrier

Lexium MC12 multi carrier transport system

Lexium MC12 multi carrier is an innovative transport system to be used in machines. It uses latest linear motion technology to move products individually through the machine. These individual movements allow for new machine designs making machines faster, more flexible and space efficient.

New level of performance & flexibility for more sustainability

- Less format specific parts needed, a big step ahead in direction of toolless change over at a push of a button
- Leap in flexibility, larger variety of products can be run on the same machine

Simplified operation and maintenance

- Integral part of PacDrive 3 system diagnostic mechanisms
- Automatic configuration after replacement of segments or carriers
- Enhanced diagnostics and commissioning with EcoStruxure Machine Expert software
- Mobile app for diagnostics (Industrial Device)
- Integral part of Schneider Electric’s solution for remote monitoring/health monitoring and predictive maintenance (Machine Advisor)
- Modular mechanical design for quick replacements
- Automated lubrication: Two components of the multicarrier offering are designed to support automated lubrication of the transport system: their use reduces manual maintenance and improves system longevity

Differentiation & saving time in machine design for less time to market

- Game changer for machine design
Next generation of multi carrier system, providing new leeway for even better machine designs
- The evolution – mechanical camming – electronic camming – no camming – is providing new unknown potential for more flexible machines with less footprint!
- Efficient engineering and life cycle management with a single and well-known engineering tool
- Shorter time to market though easy and time saving mechanical/electrical/program implementation
- Virtual commissioning to verify machine behavior in an early implementation phase
- Transportation, grouping and positioning of products is completely decoupled from the machine cycle

Increasing the Overall Equipment effectiveness of machine

- > Flexibility: more formats per machine and simplified change over procedures with less format specific part
- > Optimized maintenance by high-service-parts
- > Higher machine uptime
- > Better use of production space through machines with less footprint

Main fields of application

- Lexium MC12 multi carrier is transporting, grouping and positioning products in discrete processes for such typical applications:
 - > Packaging
 - Cartoning
 - Stacking (grouping)
 - Product flow adjustments (gap correction, position correction)
 - Filling, folding (tubes, bottles, pouches, ...)
 - Labelling
 - > Food processing
 - Applicating
 - Cutting
 - > Assembly
 - Mechatronical products
 - Pharmaceutical products
 - > Material handling

Packaging application

Food processing application

Assembly application

Examples of applications

The Lexium MC12 multi carrier system is a transport system for moving, positioning or grouping objects in machines for discrete processes.

Filling

Filling

- Multi carrier replaces transportation chain
- Individual bottle movements
- Bottles move twice as fast through capping station
- Smaller gaps between products outside processing stations reduces footprint
- Clamping for different bottle diameters increases flexibility
- Less stations (cost savings)
- More compact
- Faster and simplified format change

Grouping

Grouping

- Products can be loaded on the fly
- Pocket size can be adjusted to adapt to formats or to simplify loading
- Products move individually, high performance, increasing group size does not impact performance
- Buffer between loading and unloading station can compensate jitter in product flow
- Flexible grouping patterns

Stacking

Stacking and Grouping

- Pocket "grows" with products put into pocket
- Different products from different infeed stations can be stacked into same pocket
- Grouping of stacked products
- Products can be pushed together

Pick and Place

Pick and Place with variable speed of carrier

- More picks per min, products can be picked more often in robot sweet spot by slower speeds in working envelope and higher speeds during transfer (to next robot)
- Better accuracy, no belt slipping

Free movements

Free movements

- A carrier can be moved freely throughout the track. It can brake, accelerate, position or exert a constant force when stationary or also in motion. Like any linear motor, the carrier can synchronize on other movements. When arranged in a circle, the carriers move endlessly following the flow of product.
- Several carriers can all be moved independently of each other. They can be positioned at absolute positions over the entire distance traveled. In addition, they can be moved relative to each other and avoid collisions with their neighbour.

Lexium MC12 multi carrier

The multi carrier transport system

System components to create a track

System components to create a track

Lexium MC12 multi carrier is a modular system for machine applications and consists of long stator motors, on which multiple carrier units can be moved independently from each other.

- > The system components are designed for compact, modular, flexible and efficient machine designs. Lexium MC12 multi carrier can reduce engineering efforts, mechanical variants, and changeover time.
- > The components of Lexium MC12 multi carrier are mounted at the machine frame.

Guide rails 1

- > Same curve and straight guide rails are installed at top and bottom of the straight and curved long stator motor segments, used to handle the carriers. Guide rails are available in different length and can be combined freely.

Carriers 2

- > The carrier contains magnetic plates which, with the coil of the long stator motor segment can generate propulsive force. The encoder integrated in long stator motor segment measures the position of each carrier.
- > Up to 200 removable carriers can move on a same track. The motion of each carrier is independent from each other allowing different spacings, different cycle times, and different speeds (up to 4 m/s).
- > The minimal gap between two carriers is null.

Straight 3 and curve 4 longstator motor segments

- > These are linear motors with integrated power electronics and multi carrier position measurement. The longstator motor segments can be combined freely into open and closed tracks, and can be mounted from top on a base plate.
- > Integrated mechanical alignments simplify the mounting process.
- > No cabinet space is required for the drive electronics as it is integrated in the track segments.
- > Straight long stators are designed for automatic rail lubrication. A minimum spacing of 6 meters (19.7 ft) between lubrication points is recommended.
- > Tracks can be designed in machines in horizontal or vertical position.
- > The maximum length of a track is 40 m (131.2 ft) (1)
- > Each segment is equipped with electronic type plates which enables the controller to identify the segments and the resulting track geometry automatically.

Communication interconnect 5

- > Communication interconnects are used to interconnect the straight or curve longstator motor segments and to support the transmission of the communication (Sercos III), and of the SFO safety function (Safe Force Off).

Connection modules 6

- > The Connection modules ensure the overvoltage protection, and the supply voltage monitoring.

Power interconnects 7

- > Power interconnects are used to interconnect the straight or curve longstator motor segments, and to support the transmission of the DC power, ensuring a quick wiring.
- > When mounting two longstators, supply voltage is automatically connected through.

(1) For track length of more than 20 m (65,61 ft), Please contact your SE representative.

Available Open or closed track geometries

Vertical orientation

Horizontal orientation

Communication interconnects associated to Sercos as provided by LMCPro2 motion controller (1) and safe outputs: TM5SDO4TFS, TM5SDO4TAFS safety modules, and XPSMCMRO0004G, XPSMCMDO0004G modular safety modules (2) combined with Harmony XB5 Emergency stop pushbuttons (3). ABLU3A48200 (4): 3-phase power supply is dedicated to Lexium MC12 multi carrier system.

Setting up the system components

Designing a track

Shapes

- > Open tracks or closed tracks that can be realized with 300 mm (11.81 in) straight long stator motor segments and 200 mm (7.87 in) 45° outside curve long stator motor segments.
- > The Maximum track length is 40 m (131.23 ft) (1).
- > The free space left inside a track allows the integration of additional equipment such as Delta robots, reduces the space of an installation, and ease the access for service or maintenance.
- > **Track's orientation**
 - Track can be mounted in Vertical or Horizontal orientations.

Connecting a track

Communication interconnects

- > There are different interconnects available, e.g. to connect Sercos cables or to connect Safe Force Off signal.
- > The communication interconnects ensure the Sercos communication and Safety function:
 - Once connected, the interconnects eliminate further wiring
 - Multiple safety zones are allowed with one connection per zone

Connection modules

- > Connection module are installed close to power supply, between power supply and power connector at track. They provide the internal DC Bus and power supply on tracks, they ensure the overvoltage protection, and the supply voltage monitoring.
- > The Internal DC Bus and the power supply (48 V DC) are automatically connected through when mounting two segments.
 - No wiring is required between the segments
 - Up to three 48 V power supplies can be installed in parallel according to the needs of application
 - The Power infeed is applied in parallel at straight and/or curves long stator segments

Power interconnects

- > There are different versions available, e.g. with a power connector to connect power to the track or a disconnector which allows to split a track into different power zones.
- > The power interconnects ensure the power distribution in the track. They are mounted at the bottom side and provide an alignment aid helping to mount the long stator motor segments properly.

(1) For track length of more than 20 m (65,61 ft), Please contact your SE representative.

Lexium MC12 multi carrier

The multi carrier transport system

Complementary of offers

Complementary of offers

- Control** > Lexium MC12 multi carrier is integrated into PacDrive 3 system, using PacDrive 3 motion controllers (LMC Pro2). Lexium MC12 becomes part of PacDrive 3 architecture.
- Configuration** > Lexium MC12 multi carrier applications can be developed and commissioned with dedicated application libraries (CAD, Eplan, Application function block, ...) embedded in **EcoStruxure Machine Expert**, Schneider Electric's single engineering environment for developing, configuring and commissioning complete automation solutions, with less time to market.
The multi dimensional software architecture allows visualization and simulation during the conception of a motion centric machine.
- > Lexium MC12 multi carrier is part of the EcoStruxure Machine Expert Twin software, **Builder** and **Visu** license (integrated in EcoStruxure Machine Expert):
- EcoStruxure Machine Expert **Visu** together with the Multi Carrier Configurator of Machine Expert is allowing users to automatically create Digital twin models of 1 multi carrier, allowing to visualize 3D models for testing purposes.
 - EcoStruxure Machine Expert Twin **Builder** is allowing users to automatically generate digital twin models from tracks pre-defined in Machine Expert and deployed to a PacDrive LMC. Multiple models can be generated.
- Related products** > Schneider Electric offers several ranges of robots and products (actuators, control systems) to complete a PacDrive 3 automation solution.
- > The compact design of the Lexium MC12 multi carrier leaves space to mount additional equipment like Delta robots within closed tracks.

Lexium MC12 multi carrier

The multi carrier transport system

Communication, Embedded safety function SFO, Main characteristics

sercos
the automation bus

- Cat 5e
- Baudrate: 100 Mbps
- Cycle time: 1...4 ms

Communication

Lexium MC12 multi carrier is communicating via Sercos III automation bus, and controlled by the PacDrive 3 LMC Pro2 motion controller.

- Each carrier is handled as Sercos device by the system with a Sercos ID and a reserved area for communication, similar to a servo drive in configuration and application.

Embedded safety function SFO

Lexium MC12 multi carrier is an integral part of the Machine safety system with its drive embedded Safe Force Off (SFO) function.

- This function meets the requirements of SIL 3 according IEC 61800-5-2, IEC 62061 and IEC 61508 as well as up to category 3 and PLe according to EN ISO 13849-1.
- It simplifies the setup of installations requiring complex safety equipment and improves performance during maintenance operations.

Main characteristics (1)

Lexium MC12 multi carrier		
Peak Force (2)		120 N (26.97 lbf)
Total mass (3)		≤ 3 kg (6.61 lb)
Nominal mass of a carrier		0,8 kg (1.76 lb)
Max. payload per carrier		2.2 kg (4.85 lb)
Max. acceleration for 1 kg (2.204 lb)		120 m/s ² (393.70 ft/s ²)
Max. speed		4 m/s (13.12 ft/s)
Length	Straight longstator segment	300 mm (11.81 in)
	Curve longstator segment	200 mm (7.87 in) – Radius: 255 mm (10.04 in)
Repetitive accuracy (4)	Straight longstator segment	0.03 mm (0.001 in)
	Curve longstator segment	0.05 mm (0.002 in)
Absolute accuracy	Straight longstator segment	0.25 mm (0.009 in)
	Curve longstator motor	0.35 mm (0.013 in)
IP Class		IP65
Cleanroom Class (ISO / GMP)		ISO class 6 / GMP class B
Max. number of carriers	per track	Equals max. number of servo axis controller can handle (currently up to 200)
	per segment	6 carriers on Straight longstator segment 4 carriers on Curve longstator segment
Carrier	Width x Height	50 x 143 mm (1.96 x 5.63 in)
	Weight without load	0.8 kg (1.763 lb)
Max. track length		40 m (131.23 ft) (5)

(1) More characteristics on [Product datasheet](#).

(2) Max. force generated in moving direction of carrier, Peak force can be increased by use of multiple carriers together.

(3) Mass of the carrier plus payload.

(4) Single carrier to single point accuracy.

(5) For track length of more than 20 m (65,61 ft), Please contact your SE representative.

Track configuration

Carrier configuration

Catalog ref. [DIA3ED2180701EN](#)

Configuration

Toolset covering the machine life cycle

- Design & Engineering
 - Physical configuration of the track or generated from scan
 - Definition of coordinate system and direction
 - Handling physical dimensions of carriers and products
 - Visualization and virtual commissioning of multi carrier system
- Implement
 - Library
 - Mechanical bricks mounted by the OEM
 - Configurator
- Operating, Maintenance & services
 - Monitoring with Ecostruxure Machine Advisor
 - Visualization

Software

- As Lexium MC12 multi carrier becomes part of PacDrive architecture, its configuration is managed with Ecostruxure Machine Expert software (1) :
 - Deep integration into engineering environment
 - Different usability levels
 - Motion synchronization capabilities
 - Simulation
 - Visualization
 - Virtual commissioning

Libraries

- For the efficient
 - Predefined functions for common needs, like carrier queuing, two carrier clamping, multi carrier positioning and release, automatic gap control between moving carriers, ...
- For the experienced
 - Functions working on track level, like scanning a track, management of carriers on the track, monitoring and emergency reactions on track level
- For the experts
 - Carriers are represented like servo axis in the system
 - Existing functionality, e.g. camming can be applied to move carriers
 - Full freedom with full responsibility to manage all movements

Lexium MC12 multi carrier

The multi carrier transport system

Segment, Carrier

Type code													
To order a Segment, make up the reference as follows:													
	Family			Group		Model	Segment type	Segment geo	Length	Variant	Revision	Reserved	Function
Example	L	X	M	M	C	12	M	S	06	S	1	0	0
Product family	L	X	M										
Product group	MC: Multicarrier			M	C								
Model	12 = 120N Peakforce					12							
Segment	M = Standard segment						M						
Segment geometry	S= Straight							S					
	A= Arc outside							A					
Length	for straight segments length given in n50 mm (n1.96 in), e.g 06 = 300 mm (11.81 in)								06				
	for curved segments angle is given in n22,5°, e.g 02 = 45°								02				
Variant	Standard (Anodized Aluminum, IP65)									S			
Revision	1 = Initial version										•		
Reserved	0											0	
Function	0: Standard												0
	L: With automated lubrication												L

To order a Carrier, make up the reference as follows:													
	Family			Group		Model	Product group	Type	Length	Quantity	Variant	Revision	Reserved
Example	L	X	M	M	C	12	C	A	5	1	S	1	00
Product family	L	X	M										
Product group	MC: Multicarrier			M	C								
Model	120 N Peakforce					12							
Carrier	Always C for carrier						C						
Type (equals to model of rail)	A							A					
Size	50 mm (1.96 in)								5				
Quantity	1 piece									1			
	10 pieces									X			
Variant	Standard (Anodized Aluminum, IP65)										S		
Revision	1 = Initial Version											•	
Reserved	00												00

Lexium MC12 multi carrier

The multi carrier transport system

Rail, Bridge (Communication interconnect)

Type code													
To order a Rail (1), make up the reference as follows:													
	Family			Group		Rail	Geo. 1	Geo. 2	Model	Size	Variant	Revision	Reserved
Example	L	X	M	M	C	R	A	0	A	02	S	1	00
Product family	L	X	M										
Product group	MC: Multicarrier			M	C								
Product detail	R: Rail					R							
Geometry 1	S= Straight						S						
	A= Arc outside						A						
Geometry 2	0= no straight at end(s)							0					
	E= End of open track with curve							E					
	B= Straight at both sides							B					
Model	A								A				
Size	nn / (ul/6) ul equals length of straight segment + air gap between segments. ul/6 equals approx. 50 mm (1.96 in) 30 equals a length of 5 segments + air gaps => approx. 1.5 m (4.92 ft) rail max. rail length is 1,5 m									••			
Variant	S = Standard (Anodized Aluminum, IP65)										S		
Revision	1 = Initial Version											•	
Reserved	00												00

(1) Rails are always sold as a set of two rails (bottom and top rail).

(2) Max. rail length is 1,5 m (4.92 ft).

To order a Communication interconnect, make up the reference as follows:														
	Family			Group		Bridge	Bridge type	Model	Supplies	Quantity	Variant	Revision	Reserved	
Example	L	X	M	M	C	B	C	A	0	0	1	S	1	00
Product family	L	X	M											
Product group	MC= Multicarrier			M	C									
Product detail	B= Communication interconnect					B								
Bridge type	C= Communication closed track						C							
	D = Communication open end of track						D							
	P = Power closed track						P							
	Q = Power open end of track						Q							
Model	A= stands for current Bridge design							A						
Supplies up to 2 different inputs/outputs can be specified	0 = no supply, plain interconnect								0	0				
	D = disconnecter, interrupts connection between segment, no supply								D	D				
	P = Power supply								P	P				
	S = Bus supply (Sercos III)								S	S				
	F = Safe Force Off								F	F				
Quantity	1 = 1, X = 10										•			
Variant	S = Standard (Anodized Aluminum, IP65)										S			
Revision	1 = Initial version											•		
Reserved	00												00	

Lexium MC12 multi carrier

The multi carrier transport system

Accessory

Type code													
To order an Accessory, make up the reference as follows:													
			Family			Group		Accessory	Type	Specifics	Variant	Revision	Reserved
Example			L	X	M	M	C	A	RS	0AX	S	1	00
Product family			L	X	M								
Product group			MC: Multicarrier			M	C						
Accessory			A: Accessory					A					
Accessory type	Type	Specifics	Variant										
	FC= Safe Force Off cable	xxx: length / 10 cm (3.93 in)	S					FC	●●●	S			
	RS= Roller set	0xy: 0 Roller Type, x: type of rail see rails-model for coding, y qty: 1= 1, X= 10, L= 50						RS	0●●				
	MG= Magnet	xAy: x: Type of Magnet: E= Encoder, M= Motion, Variant = A, y qty: 1= 1, X= 10, L= 50						MG	●A●				
	CT= Carrier drop tool	0A1: 0 is not used, A variant of drop tool, 1 quantity						CT	0A●				
	CM= Connection module 20A	D02	S					CM	D02	S			
	CM= Connection module connector kit	CS1	S					CM	CS1	S			
	MK= Material kit	001						MK	001				
Revision	1 = Initial version											●	
Reserved	00												00

Advantage Service Plan for Robotics

Keep the movement on

Keep your Lexium Robots, Cobots, MC12 Multi Carrier, SCARA, Cartesian, and associated controllers running smoothly and efficiently with a service contract. Maintain productivity by reducing unexpected downtime. Get peace of mind from knowing that you have access to experienced service technicians and spare parts when and where you need them.

Key benefits

- Reduce costs by identifying and correcting potential issues before they cause unplanned downtime.
- Access to experts helps you maintain production, reduce downtime and get the most out of your robotic systems.
- Minimize unplanned downtime with ready access to wear and spare parts.
- Extend asset life with properly maintained robotics.

Advantage Service Plan for Robotics

Key features

Preventive maintenance visit

Periodic maintenance, based on the operations performed by the robot, is essential to prevent unplanned downtime and extend asset life. During the included preventive maintenance visit, our service representatives perform a routine check-up, and all the maintenance activities needed, based on the number of operations or operating time performed.

Remote technical support

Your Advantage Service Plan provides you with access to our advanced technical support team, who can answer your robotics questions and troubleshoot a problem via phone or email during normal business hours.

On site corrective maintenance service

In the event of an incident that results in unplanned downtime for your robot that cannot be resolved remotely, our service representatives can respond on site for diagnostic and corrective maintenance activities. Programming and commissioning are not included in this service.

Preferred rate for parts

For simplified ordering, we offer parts needed for the upkeep of your robots. These parts are offered at preferential rates for our contract customers.

Extended warranty (optional service)

When ordered with the contract, you can extend the warranty for one year beyond the standard warranty.

Support coverage

Support is available for the following ranges of Schneider Electric™ robots:

- Lexium Delta P
- Lexium Delta T
- Lexium Cobots
- Lexium MC12 Multi Carrier
- Lexium SCARA
- Lexium Cartesian

Service Plans (Available with TWO tiers)

Advantage Service Plan for Robotics	Duration	Essential	Advanced
Remote technical support (8X5) - Premium	1 year	Yes	Yes
Access to MySchneider portal - Premium	1 year	Yes	Yes
Preventive Maintenance visit	1 year		Yes
Preferred rate for parts	1 year		Yes
Onsite corrective Maintenance	1 year		Yes
Optional Service			
Extended warranty - 1 year	1 year
