

METALARC PRO-TECH® – HIGH WATTAGE

METAL HALIDE LAMPS FOR OPEN AND ENCLOSED FIXTURES

SYLVANIA METALARC PRO-TECH lamps allow added flexibility by incorporating open fixture technology to a full complement of lamp wattages.

METALARC PRO-TECH metal halide lamps were created to fill the need for a safe light source for use in open fixtures and for applications where an enclosed fixture is impractical. The METALARC PRO-TECH lamp design provides an additional measure of safety in open or enclosed fixtures and includes an internal shield around the arc tube. In addition, some METALARC PRO-TECH lamps have a reduction in UV output compared to standard metal halide lamps.

With the benefit of open fixtures, these high output METALARC PRO-TECH lamps are ideal for higher ceiling applications where enclosed fixtures might previously have been necessary. The use of open fixtures means more light output over life and lower maintenance costs because there are no lenses to gather dirt and dust, thus extending lamp replacement procedures.

Key Features & Benefits

- Full range of high wattage lamps from 175 through 1000 watts in medium and mogul exclusionary bases
- METALARC PRO-TECH design – shroud for containment and UV-reduction
- Open or enclosed fixture operation
- Base-Up Only operating position
- Up to 20,000 hours average rated life
- Lower maintenance costs
- Lower initial luminaire cost
- Reduced luminaire dirt depreciation by use of open fixtures
- Dedicated sockets for 175 through 1000 watt lamps for open rated fixtures
- Retrofits into standard sockets
- Available in clear and coated
- NEC 2005 and later editions require new installations or major renovations to use:
 - METALARC PRO-TECH lamps with exclusionary sockets in open fixtures, OR
 - Suitably enclosed fixtures

Product Offering

Available Wattage	Bulb Shape	Finish	Fixture Compatibility
175	ED17	Clear	Open/Enclosed
175, 250	BT28	Clear/Coated	Open/Enclosed
400	BT37	Clear/Coated	Open/Enclosed
1000	BT56	Clear/Coated	Open/Enclosed

Application Information

Applications

- Ambient lighting for industrial and retail
- Flood lighting
- Lobbies, atriums
- Malls
- Parking lots
- Security lighting

Sockets

To prevent relamping an open fixture with standard metal halide lamps, a special socket is available with open fixtures for all lamp types.

Fixtures

Consult your local fixture agent for available fixtures.

¹Contact your local LEDVANCE sales representative for availability.
²For lamp wattages of 360W and greater, it is recommended that lampholders with nickel-plated copper alloy center contacts (with spring) should be used rather than electrical contacts made of stainless steel.
³Average rated life based on 11 hours per start operating on an ANSI ballast.
⁴Exclusionary mogul base.
 O = Lamps classified as O-type, comply with ANSI Standard C78.389 for containment testing and may be used in open luminaires. See lamp warning.

Lamp Dimensions

	(A) MOL	(B) LCL	(C) Diameter
ED17	5.4" (137.2mm)	3.4" (86.4mm)	2.1" (53.3mm)
BT28	8.3" (210.8mm)	5.0" (127.0mm)	3.5" (88.9mm)
BT37	11.5" (292.1mm)	7.0" (177.8mm)	4.6" (116.8mm)
BT56	15.4" (391.2mm)	9.5" (241.3mm)	7.0" (177.8mm)

Safety Information

WARNING: This lamp can cause serious skin burn and eye inflammation from shortwave ultraviolet radiation if the outer envelope of the lamp is broken or punctured. Do not use where people will remain for more than a few minutes unless adequate shielding or other safety precautions are used. Lamps that will automatically extinguish when the outer envelope is broken or punctured are commercially available.

This product conforms to the following federal regulations: U.S.A.: 21 CFR 1040.30 and CANADA: SOR/80-381.
