

Ideal lighting for control cabinets, machines and industrial environments

The control cabinet is often a work area without much lighting. Here, a space-saving, bright and at the same time affordable solution is needed. Lighting systems in machines and industrial environments must also meet high requirements such as longevity and maximum protection.

Here, our different series serve the optimal use:

Weidmüller Industry Light Series

WIL - LED light with flat mounting height for optimal use in the control cabinet

WIL-L - Swivelling LED light for use in machine rooms

WIL-E - LED light for focused lighting of machine processes

WIL-S - Compact LED light for industrial environment
