To improve the functionality of the cleaning unit, we have installed a fluid injection system to the latest version of the PrintJet Advanced printer. This provides a regular, automatic moistening of the unit with a special but environmentally friendly fluid to keep it running smoothly. One bottle of 100ml is enough to print 5.000 MultiCards. The bottle can be changed by a simple installation into the adapter. Please check if your PrintJet Advanced has been equipped with this adapter which is located beside the magazine for MultiCard.
