### Features

- Designed to protect electrical and electronic controls, components and instruments in typical industrial environments
- Enclosures protect enclosure equipment from dust, dirt, oil, and dripping water
- These enclosures are used in machine tool applications for housing motor starters, drives, contactors, PLC's, as well as a wide variety of other electrical and electronic equipment
- The addition of 19-inch rack mounting accessories make these enclosures ideal for providing rugged protection for sensitive rack mounted components in harsh industrial environments
- The enclosures are found extensively in automotive, pulp and paper, wood products, textile and similar industries
- Two styles are available to provide maximum flexibility: a) Single Door Single Access (single door on front) b) Two Door Single Access (two door on front).

### Application

Designed to house electrical and electronic controls, terminals, and instruments in areas that are regularly hosed down or are otherwise very wet. Enclosures are also suitable for outdoor applications.
